

Universal Tool Tray

Part #: AGA-SS-UTT

Universal Light Kit is often sold in combination with the Universal Tool Tray

Problem:

While working on a vehicle there is little room to place tools and parts in the engine compartment without the concern of dropping them onto the motor and into the engine compartment. This creates frustration for the technician, increased chance of losing tools, and making costly mistakes.

Solution:

AGA's Universal Tool Tray. The Tool Tray is made of heavy duty 18 gauge 304 stainless steel with formed edges. The kit comes with legs that can be reversed and used as hooks, making the tray's use universal in almost any application.

Benefits:

With the Universal Tool Tray placed in front of you, you avoid having to constantly turn around to place tools and parts behind you on a bench. The tray can fit onto many engines due to its ability to adjust to almost any scenario.

Universal Tool Tray Instructions

Before using, please watch AGA's Universal Tool Tray Video at www.agatools.com

Step 1:

To install the legs and endplate, simply install the supplied knobs through the holes in leg or endplate. Make sure both washers and the center compression washer stays on the outside of the legs. As shown in the picture on left.

NOTE: Both, stainless steel washers, and compression washer in the center stays on the outside of the leg.

Step 2:

Place Universal Tool Tray in the engine area and adjust legs to create stability. Then place your tools and parts on the Universal Tool Tray as needed.

Here shown with optional AGA Universal Light Kit. Part # AGA-ULK-20
