Boasting a cleaner yet more powerful engine and a host of new items as well as significant refinements, Zaxis is the next generation in excavator development.**

### **High-Power Engine**

The Isuzu BB-6WG1X generates

- 395 hp @ 1,800 rpm in P mode  
(295 kW/min<sup>-1</sup>)
- 1,140 lbf·ft max. torque @ 1,500 rpm  
(157 kgf·m/min<sup>-1</sup>)

and meets all Tier II emissions regulations.

### **Rigid Undercarriage**

A reshaped box design with X-beams helps disperse stress and boosts the overall rigidity of the entire undercarriage.

### **Multi-function Operations**

The Zaxis 600 continues the Hitachi tradition of smooth, multi-functioning excavators. Executing combined operations such as simultaneous swinging and traveling are easy with Zaxis.

### **Durable**

Extensive steps have been taken to improve basic performance and overall durability.

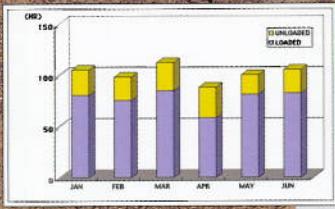

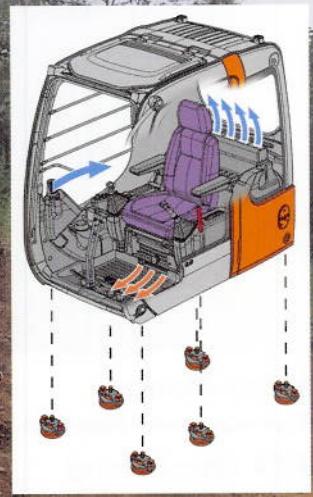

# One POWERFUL Solution

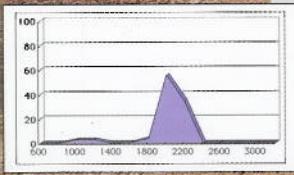

## Safety, Comfort, and Convenience

The operator's compartment is designed for both comfort and operating efficiency.

## e-Information Technology

The onboard ICX information controller tracks the operational status of the excavator. This information is easily downloaded so you can analyze how well your machine is performing.

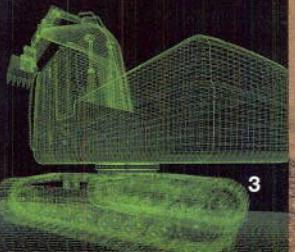

Onboard ICX  
(Information Controller)

PC

## Information Services for Equipment

- Operation record
- Error record
- Alarm record
- Frequency distribution
- Radiator coolant / hydraulic temperature etc.
- and others.

# THE ZAXIS ADVANTAGE

## Higher Productivity

Zaxis uses the latest technologies to achieve lower total operational costs while boosting productivity. The bucket digging force (SAE:PCSA) is an impressive 65,258 lbf (29 600 kgf). P mode increases production 12% over the EX550.

## Cab Comfort

The Auto-control air conditioner allows you to set a specific temperature, then forget it. Bi-level air ducts are positioned throughout the cab to promote even air flow. A reshaped X-beam track frame, D-type frame and rigid cab bed work together with the 6 silicone-filled rubber cushions to reduce noise and vibration.

## Work Modes

Four work modes have been enhanced from prior models.

## ICX Monitoring

Zaxis excavators monitor and store a variety of operational data. This includes: alarms given, error records, hours of operation, engine speed distribution, average pump pressure distribution for digging and travel, radiator coolant temperature, fuel level, swing, travel and front operation, and more. This data can be downloaded in the field to a palm-type computer, then uploaded onto your office PC for analysis.

*The powerful engine and hydraulic system work together to bring the maximum amount of excavating forces to the toughest of job sites.*

## Cab Safety

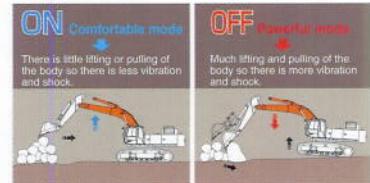

The CRES (Center pillar Reinforced Structure) rigid cab is designed with safety in mind. The closed-section pillar and reinforcing members at central areas withstand vertical and horizontal external forces. This can help reduce the potential of operator injury in the event of an accident.

## Operator Command

For increased productivity in heavy-duty operations, select the H/P mode to automatically boost engine output. Four work modes increase overall performance.

## Boom Mode Selector

The Boom Mode switch allows you to dampen the amount that the body can be lifted or pulled by the front of the machine. This reduces vibration and shock while contributing to a longer component service life.

## Auto Acceleration

Engine speed is automatically controlled in response to the amount of lever operation. This helps reduce fuel consumption, especially during light-load work.

## Lower Operating Costs

Strengthened components, longer lubrication intervals, reduced fuel consumption, 4,000-hour hydraulic oil and 1000-hour hydraulic oil filters extend Zaxis durability while reducing running and repair costs.

Easy-to-read monitor panel.

*Cab design both guards the operator and contributes to efficient operation through its comfortable, ergonomic layout and its CRES design.*
