

# A better way to share information

According to a 2018 survey of 1,500 U.S. consumers:\*

**67%** of people are concerned with data privacy when using fintech apps

**56%** of people want to control which financial accounts and types of data that third parties can access

Many consumers have several financial accounts ...

... and want to share financial data with new financial apps

FINANCIAL ACCOUNTS

banks

lenders

payment cards

**TODAY** Most of the financial industry uses complicated, non-interoperable processes to share consumer data

It's time for an industry standard that promotes:

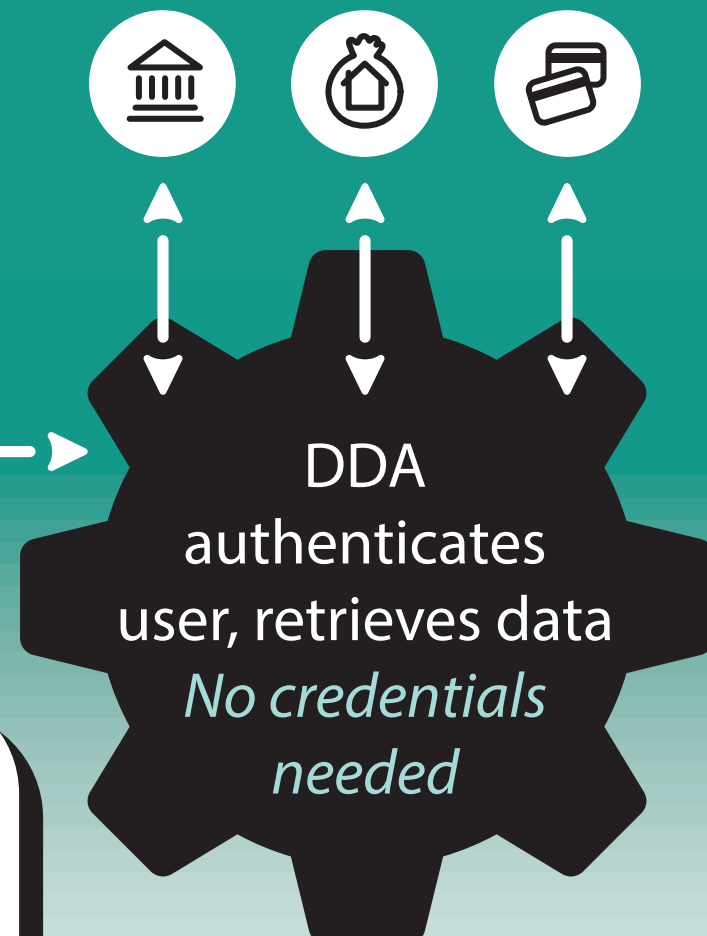

security

consumer control

innovation

We're launching **FDX and the Durable Data API (DDA)** to make financial data sharing more simple, inclusive and secure
