

Artificial Turf Surfacing Care Guide

Use a rake or leaf blower to clear off fallen leaves, branches, and other rotting debris that may land on top of your artificial grass. This will help your grass maintain a clean and well groomed look.

Our artificial grass is stain resistant and most spills can be washed away with a bit of water. For those tougher using a mild soap with lukewarm water or use equal parts vinegar and water to scrub it out. The faster you tend to a spill or stain the better.
