

## Bonded Rubber Care Guide

1. Power wash or scrub with soapy water whenever surface is soiled. Do not allow debris to collect on the surface. Do not use aggressive cleaners or solvents.
2. Avoid walking on the surface with cleats, high heels or any shoe that has potential to penetrate the surface, A 125 lb woman wearing high heels has an impact of 2,000 lbs/ sq. in and can tear through the surfacing.
3. After 3 years, we recommend a recoat of the surface with our specially formulated surface rejuvenator.
4. Avoid getting lawnmowers too close to surface edge.
