

CHEF ELECTRIC MEAT MIXER 220LBS CAPACITY

BX-100A

DESCRIPTION

The filling mixer is a food processing machine for mixing food-shaped pieces such as fillings.

It uses two stirrers to whirl from positive to negative in the charging basket so that it can get very uniform and ideal mixed materials.

The parts of the filling mixer that contact the food are made from stainless steel or specially treated surfaces, which are all in line with the national food hygienic standard.

Stainless steel material

Electric controller

Minimum visual impact

For the consumer: easy access to products

For the staff: easy product loading and rearranging
