A3 TRANSPORT

*This device cannot be handheld. Therefore, use a lifting vehicle (forklift or pallet truck) to transport the device. (The lifting arms of the forklift or pallet truck must reach more than half of the bottom of the device).

A4 OPENING THE PACKAGE

*The device must be opened and its packaging must be destroyed in accordance with the regulations in the country of use. Food contact parts are stainless steel. All plastic parts are marked with the symbol of the material.

*Check that the parts of the device are complete and that there is no damage during transportation.

B ASSEMBLY

*Place the product on a flat and solid ground, take necessary precautions against risks of tipping over.

*The personnel who will provide installation and service to the device must be experts in their field and have an installation-service license issued by our company.

*All adjustments and changes to the gas installation and electrical connection of the device must be made by an authorized person.

*The environment where the gas appliance is located must be adequately ventilated and must have air vents.

*The device must be connected in accordance with the national and local gas standards of the relevant country.

*Device gas inlets are marked on the body with the "G" label.

The grounding connection of the device must be made in accordance with standards and safety rules.

*The grounding of the device must be connected to the grounding line of the electrical installation on the nearest panel.

*The device's electrical connection, main fuse and residual current fuse must be made in accordance with the current regulations and rules.

*Connection to the gas installation must be made with a metal flexible pipe of appropriate diameter and a ball valve. The ball valve in question should be fixed in a place away from heat and easily accessible in case of danger. After the gas inlet connection is made, possible gas leaks should be checked.

*Gas and pressure must be adjusted according to the data on the device data plate. If the gas type to which the device is set is not suitable for the gas type at the installation site, follow the written instructions for adjusting it to a different gas type. **(Topic: G)**

*For ease of maintenance and cleaning of pizza ovens, a space of at least 50 cm should be left on the right and left.
