

## CHEF 16 TRAY ELECTRIC PROOFER

# XF-16A6

## DESCRIPTION

This proofer is made of stainless steel, heating the weather by electric thermal, and then produce much steam in the chamber.

Humidity in the chamber can reach 80%~85%, control temperature between 35°C (95°F) to 40°C (104°F), which is suitable for fermenting.

Add dry heating tube and a heating plate, keeping temperatures, and optimizes fermenting effect.

Hot air convection in the chamber, evenly temperature inside, precision control temperature and humidity.

Humanization door, easy open and close, luxury visible glass door, the fermenting process under your eyes.

Big capacity, multi-player, long beautiful handle give you the best feeling every time you open and close it.

Trays are not included.
