

ENGRAVING FORM

Please fill in each box in the fingerprint section so we can use the best one. Try to get your fingerprint to be as close to the sample print as possible. Do not roll your finger. Gently touch your finger to the paper and slowly lift it straight up. The fingerprint does not need to have dark lines. They may be light as long as they are clean and visible. If you see excessive smudging or grey areas between the ridges of your fingerprint please try again. Remember, the more prints you send the better it will look on your ring.

FINGERPRINT
