

# SHUTTLE BALANCE FEATURES

1. Adjustable Suspension Chains
2. Adjustable Arrestors
3. Balance Platform
4. Safety Bars
5. Elastic Dampeners
6. Shuttle Balance Step

## Adjustable Chains

Adjust the Balance Platform height, degree of stability and tilt sensitivity - can also incorporate sitting protocols.

## Safety Rails

Convenient handles provide security and increased confidence during all phases of training.

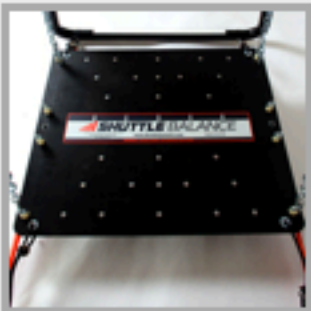

## Adjustable Arrestors

Travel tethers attached to frame and Balance Platform allow you to control range of perturbation and lateral movement.

## Elastic Dampeners

These bands provide dual benefit of softening perturbation as well as allowing progressive resistance for both abduction and adduction protocols.

## Balance Platform

Non-slippery surface provides secure footing and assists you in determining and repeating foot placement. Supports up to 500 pounds.

## Shuttle Balance Step

The Balance Step provides your most debilitated patients with easy ingress and egress - the comfort, confidence, and security they desire to utilize the Shuttle Balance.
