

TESTED TECHNOLOGY

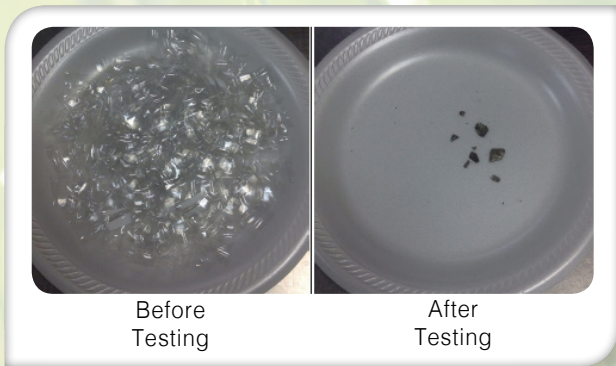

Bio-Tec Environmental conducts long-term biodegradation testing to verify all claims!

Take a look at before and after testing images from Bio-Tec Environmental's long-term biodegradation testing! EcoPure has been making plastics biodegradable since 2008 and we have thousands of satisfied clients!

Test Method: ASTM D-5511

Testing Laboratory: Eden Research Laboratory

Number of days PET Samples were tested: 1228

Sample
Material:
PET Bottle

Percent Biodegradation: 60.1%

Test Method: ASTM D-5511

Testing Laboratory: Eden Research Laboratory

Number of days Plastic Samples were tested: 1779 Days

Sample
Material:
PE T-shirt
Bags

Percent Biodegradation: 79.9%

CALIFORNIA LAW

Regulation in California currently prohibits the sale of plastic products and packaging that are labeled with the terms 'biodegradable,' 'degradable,' or 'decomposable,' or any form of those terms. The law also prohibits language that implies in any way that the item will break down, biodegrade or decompose in a landfill or other environment. These restrictions apply to all sales into the State of California, including sales over the Internet.
