TO PREPARE AN ESPRESSO THAT'S
FULL OF FLAVOR.**

HIGHLIGHTS & FEATURES

100% CERAMIC GRINDERS

Gaggia uses 100% ceramic grinders because of their consistent grind without overheating the coffee bean for an impeccable espresso. Ceramic also ensures long-lasting performance and a totally silent operation. 5 steps adjustable grinder.

QUICK HEAT BOILER

Quick heat boiler technology ensures your machine is always ready. Now you won't have to wait between brewing each espresso.

AUTOMATIC CIRCUIT CLEANING

Gaggia designed this espresso machine to automatically clean its coffee circuit with water upon starting up or switching off of the machine, this delivers a great, fresh taste with each cup of coffee.

AUTOMATIC MILK FROTHER

Preparing a tasty cappuccino is easy thanks to the new, patented automatic milk frother with its cyclonic chamber(only with Gaggia Naviglio Deluxe). The milk frother, which baristas also call "cappuccinatore", will draw milk directly from a milk carton or jug and froth it automatically, dispensing it directly into your cup.

SAVES COFFEE LENGTH & STRENGTH

You will always get a perfect cup of espresso brewed according to your personal preference, thanks to our memo function which allows you to adjust the coffee length and strength to suit your taste.

EASY CLEANING

The Gaggia brewing group is removable and you can easily clean it under the water. You can comfortably put the drip tray and servings container in your dishwasher.
