PROTECTING YOUR DOG IN A CRISIS

Smoke, dust, mold, emissions, ash, chemicals, and allergens can negatively affect the long-term health of dogs. K9 Mask® protects dogs from toxic air in a crisis. Using an N95, PM2.5, and Activated Carbon air filter the K9 Mask® is the highest quality air filter mask for dogs. It's a proven solution for any extreme air quality conditions. Trust K9 Mask® to protect your pet from poor air quality.

K9 Mask® Features & Benefits

N95 rated filter

Filters up to 95% of non-oil based air particulate matter. Rating standard of U.S. CDC (Centers for Diseases Control and Prevention) and NIOSH (National Institute for Occupational Safety and Health).

PM 2.5 filter

Filters out particulate matter up to 2.5 microns in width, which are the most harmful air particles to inhale causing short and long-term health problems.

Activated carbon filter

Bonds with harmful air molecules reducing toxin levels from entering a dog's lungs.

Exhale panting valve

Releases heat while a dog is panting to keep cool.

Washable mask with replacement air filters

Maintain freshness and effectiveness every time you need to protect your pet.

Empowering you to protect your pet from air pollution.
K9 Mask® is designed in Austin, Texas, USA. Made in USA.
