

COARSE THREAD DRYWALL SCREWS

WITH TENZ[®] TECHNOLOGY

The secret behind the
TENZ[®] Stairs
Thread Technology

The stairs called “Stairs of the Peak (SP)” and “Stairs of the Vale (SV)” are located along the thread and their precise shape makes it possible to displace the wood fibres in a gentle way. The interplay between the pair of stairs makes the TENZ[®] Stairs Thread Technology so unique.

Saves Time
Saves Money

5 REASONS FOR TENZ

- 1 MORE POWER WITH ONE BATTERY**
Maximum utilization of the battery power. Set up to twice as many screws with one battery charge.
- 2 PROTECTS HAND & BACK**
Doctors and physiotherapists recommend TENZ Stairs thread technology[®] as particularly back-friendly.
- 3 INCREASES TOOL LIFE**
Lower costs, as the service life of the tool is increased up to 10 times.
- 4 TOP PERFORMANCE - MINIMUM EFFORT**
Up to 50% less resistance reduces the amount of working power required for screwing.
- 5 PROTECTS WOOD**
With TENZ Stairs the wood fibres are gently displaced instead of being drilled or milled. This effect is unique for Tenz Technology.
