port, or your phone is micro USB port、Lightning port, for example: Google Pixel 3, you need to buy the adapter as below. In order to enhance our customer experience, you can contact us, we will send you for free.

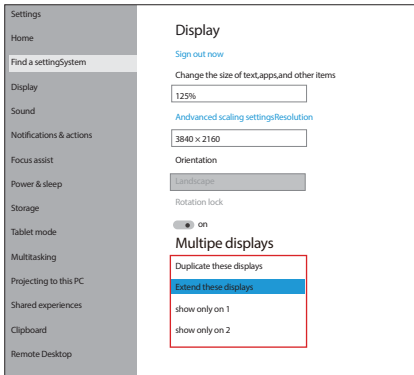

Chapter 04

Setting Up(Windows10)

Extend Mode /Duplicate Mode/Display Mode

Way1: Set on the device'Display Settings

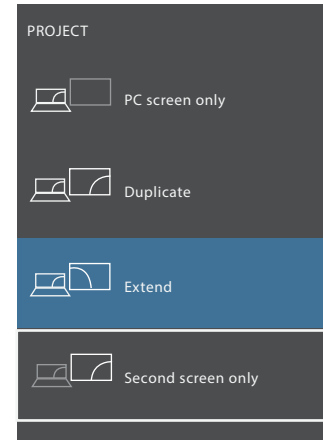

- A: Verify that your cables are connected properly to the new monitors.
- B: Right-click anywhere on your desktop and select Display settings to open the Display page.
- C: Scroll down to Multiple displays, then select an option from the drop-down list to determine how your desktop will display across your screens. For the largest work area, select Extend desktop.

Note: If you cannot see the additional monitor(s) listed, click Detect. If does not work, try restarting your computer and do steps again.

Way2: Set via Windows key + P keyboard shortcut

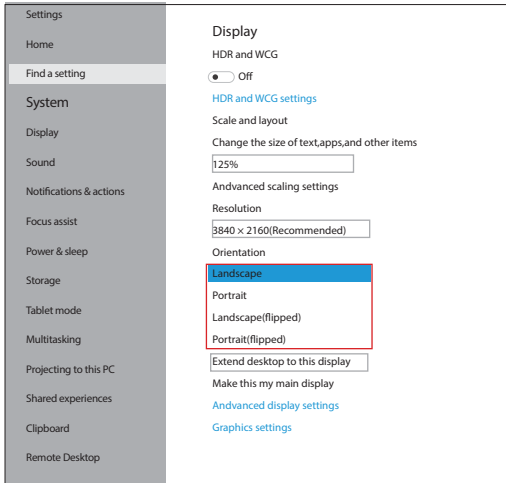

- A: Verify that your cables are connected properly to the new monitors.
- B: Enter the "Windows" key and "P" keyboard at the same time.
- C: select an option from the drop-down list to determine how your desktop will display across your screens. For the largest work area, select Extend desktop.

Note: If you cannot see the additional monitor(s) listed, click Detect. If does not work, try restarting your computer and do steps again.

Rotate the Screen

- 1: Verify that your cables are connected properly to the new monitors.
- 2: Right-click anywhere on your desktop and select Display settings to open the Display page.
- 3: Under the "Select and rearrange displays" section, select the monitor that you want to adjust.
- 4: Under the "Scale and layout" section, use the Orientation drop-down menu to select Landscape or Portrait screen.

Chapter 05 Screen Adjustment

- 1.Press the MENU button to activate the setting.
- 2.Scroll the "+"/"-"button up and down to toggle between options in the Menu, choose "Rest"
- 3.Press the MENU button and reset the monitor.

Chapter 06

Q&A

Q: The monitor keeps switching and flicker, although it connected to outlet for extra power supply.

A: This situation is generally caused by insufficient voltage; Please check whether the factory-packed cables are used, and then check whether an external PD power supply is used. The power consumption of 4K monitor is relatively larger, and an external PD power supply is required.

Q: Are vesa mount screws included? if not what are the exact specifications for the vesa mount screws needed?

A: The vesa mount screws are not included, and the specifications are 75x75@M4.

Q: Can we supply energy from power bank without using self power adapter?

A: That depends on the output of the power bank, because this monitor requires at least 15W power supply. And if the output of your power bank is only 10W , this power bank will not supply enough energy for the monitor. The output of power adapter we provide is 30W, so a power bank with output above 30W is recommended.

Q: Is it possible to set the default contrast? I have to adjust each time from 10% to 70%, each time I connect to my Macbook Pro laptop.

A: How to save the settings of brightness, volume, etc.

-When the HDMI port is used for display and monitor powered by PD port, all the settings will be saved automatically.

-But when the Type-C port is used for display without external power supply, brightness and volume will not be saved after the monitor is powered off, this design is to avoid that the monitor doesn't work when connected to phones which could not provide enough power for monitor with high brightness setting. So to avoid the brightness is reset everyday, please give the monitor an external power supply with "PD" port and do not cut off the power.

Actually, all the portable monitors on Amazon all have this same design.

Q: Does the monitor support Free Sync function?

A: Yes, it does. Please note that this feature must be in "Game Mode" mode. Please refer to the "Introduction to OSD" in the instruction manual, and set the display to "Game" mode.

Q: The output resolution of the monitor is less than 4k 60hz, what is the reason?

- A:**
1. Check the display settings on the device and adjust the resolution to 4k;
 2. Connect to another device and check if the output resolution is 4k;
 3. If it still cannot be adjusted, please check whether the graphics card of the device supports 4K. If your graphics card does not support 4K, the output resolution of the monitor will also be lower than 4K;
 4. If the above methods can not solve the problem, please contact us. Our professional team will give you a satisfactory answer within 12 hours.

Q: The power indicator is on, but the screen is black or the screen is fixed.

- A:**
1. Please use the factory-packed cables we have equipped;
 2. Please check whether there have video signal transmission;
 3. Check whether the monitor is in the default extended mode, please change to duplicated mode/mirror mode, and then the screen will be displayed;
 4. If possible, please try to connect to another device.
 4. If the above methods can not solve the problem, please contact us. Our professional team will give you a satisfactory answer within 12 hours.

Chapter 07

Service Support

Dear Customer,
Thank you for purchasing the Newsoul® Portable USB Monitor!
We offer 100% money back guarantee in 30 days and 90 days replacement, 12 month warranty for any issue, professional tech support to ensure no-worry service.
