# Chapter 04

## Setting Up(Windows10)

### Extend Mode /Duplicate Mode/Display Mode

#### Way1: Set on the device'Display Settings

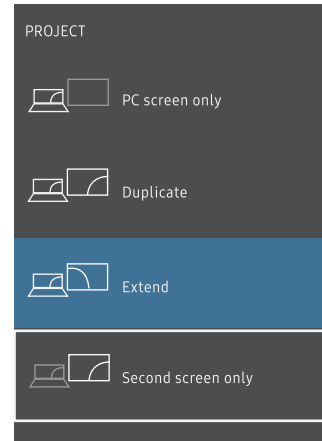

- A: Verify that your cables are connected properly to the new monitors.
- B: Right-click anywhere on your desktop and select Display settings to open the Display page.
- C: Scroll down to Multiple displays, then select an option from the drop-down list to determine how your desktop will display across your screens. For the largest work area, select Extend desktop.

**Note:** If you cannot see the additional monitor(s) listed, click Detect. If does not work, try restarting your computer and do steps again.

#### Way2: Set via Windows key + P keyboard shortcut

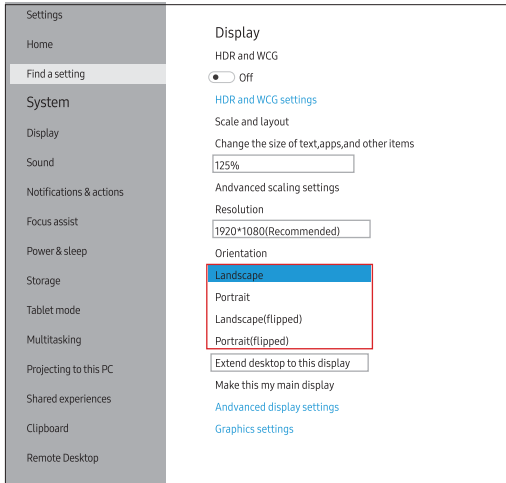

- A: Verify that your cables are connected properly to the new monitors.
- B: Enter the "Windows" key and "P" keyboard at the same time.
- C: select an option from the drop-down list to determine how your desktop will display across your screens. For the largest work area, select Extend desktop.

**Note:** If you cannot see the additional monitor(s) listed, click Detect. If does not work, try restarting your computer and do steps again.

## Rotate the Screen

- 1: Verify that your cables are connected properly to the new monitors.
- 2: Right-click anywhere on your desktop and select Display settings to open the Display page.
- 3: Under the "Select and rearrange displays" section, select the monitor that you want to adjust.
- 4: Under the "Scale and layout" section, use the Orientation drop-down menu to select Landscape or Portrait screen.

- 2.If it is a TYPE C signal source, the monitor need to connected to an external power supply first, then you can save the settings.

## Chapter 06 Q&A

**Q:** Abnormal conditions occurred - like the splash screen or spots when using the monitor.

- A:**
1. It is caused by an insufficient power supply. Monitor required large power support. Please use the attached genuine cable provided to power the monitor.
  2. If use the mobile power bank to power the monitor, please confirm whether the mobile power bank is a PD power bank that has reached 30W or more. Please contact us if you need a power bank.
  3. If the resolutions above do not work, please try another computer device. If it failed, please contact us for the replacement of the cable.

**Q:** The monitor fails to start and the screen is blank.

- A:**
1. Please TURN ON the power supply.
  2. Please check whether the connection is correct. Please unplug the cable and reconnect. Please use the genuine cable and the power adapter.
- Note: Most Samsung mobile phones can not power for the monitor, please power the monitor with an additional power adapter.
3. Please contact us if the troubleshooting above does not help.

**Q:** : The display is TURN-ON, shows "NO SIGNAL" or "POWER SAVING".

- A:**
1. Please check if the mobile phone supports USB3.1./Thunderbolt 3. when you are using Type-C to Type-C to connect the monitor and the mobile phone. An HDMI adapter is required to transfer the signal if your mobile phone does not support USB3.1./Thunderbolt 3.
  2. Please check whether the connection is correct. Please use the genuine cable provided.
  3. Please try another computer. If it failed, please contact us for the replacement of the cable.

**Q:** The monitor is constantly restarting.

**A:** 1. It is caused by an insufficient power supply. Monitor required large power support. Please use the attached genuine cable provided to power the monitor.

2. If use the mobile power bank to power the monitor, please confirm whether the mobile power bank is a PD power bank that has reached 30W or more. Please contact us if you need a power bank.

3. If the resolutions above do not work, please try another computer device. If it failed, please contact us for the replacement of the cable.

## Chapter 07
