

Safety Tips for Baby at Daycare

At Boppy, our purpose is to empower, support and educate Mom throughout her journey of motherhood. We've teamed up with First Candle, a leading national nonprofit dedicated to the survival of babies through the first year of life to educate caregivers on the importance of safe sleep practices for infants.

Be sure your daycare uses Boppy products safely.

Never let baby sleep on a Boppy Pillow or Newborn Lounger

Boppy Infant Support Pillows are great for feeding, propping, sitting or tummy time and can be very helpful in a daycare setting to ensure comfort for baby. But Boppy Pillows and Newborn Loungers are not for sleep or naps.

Never put baby on a Boppy Pillow or Lounger on an elevated surface

Boppy Pillows and Newborn Loungers offer great support and a comfy place for baby to hang out, but because it is still possible for baby to roll and wiggle please keep baby safe and off elevated surfaces while using these products.

Never stack Boppy Pillows around baby for sitting

If baby is not ready to sit, please try other options using the Boppy Pillow, like propping or tummy time. This product is not intended to be stacked or used with other products or pillows.

Create a Safe Sleep Environment for Baby

- To prevent baby from overheating, don't overdress baby or use blankets.
- Use a crib that meets current safety standards with a mattress that snugly fits the crib.
- Make sure baby's room is well ventilated and a comfortable temperature.
- Never put anything soft, loose or fluffy in baby's sleeping space, including Boppy Pillows.
- Never place baby to sleep on a soft surface. This includes sofas, chairs, pillows, cushions, comforters and sheepskins.
- Never expose baby to cigarette smoke.

Positioning Baby in the Newborn Lounger

- Ensure baby is placed with the chin off the chest. Keep airways open at all times.
- Do not leave babies unattended, adult supervision required.
- This product is appropriate for infants up to a maximum of 16 pounds, or until baby can push up on hands and knees or roll over unassisted (whichever comes first).
- For awake time only.
- Too high
- Too curled
- Sideways or face down
- Never move the Newborn Lounger while baby is on it.

Boppy Products are for Awake Time Only, Not Sleep

If baby falls asleep on a Boppy product, it is time to move them to a safe sleeping spot. Boppy products are designed for supervised awake time only, not sleep.
