70.4	22.4		Z+1					
71.0	22.6	13 ^{1/2}	Z+2					

RING SIZE GUIDE

OPTION 1

Print this page in US Letter size and scale to 100%. Check accuracy of the print by placing a credit card

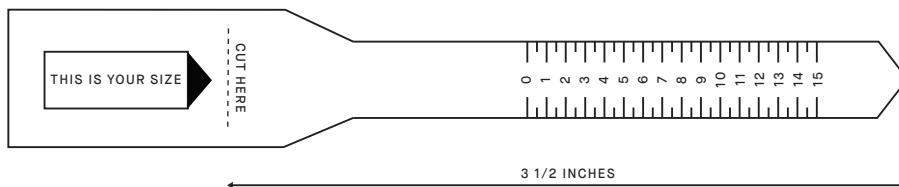

OPTION 2

Wrap a ribbon snugly around the base of your finger and use a fine point pen to mark the edge of the overlap. Unwrap the ribbon and measure the inches or millimeters up to the marks. Find measurements in the circled above.

OPTION 3

Print this page and cut out the ruler. At the dotted line make a small slit. Wrap the ruler around

*Please note that all of the above options are general guidelines as measuring in this way is less accurate than having your finger measured with a jeweler's ring sizer. Sizing can also vary slightly from day to day, depending for example, on the temperature (fingers shrink in the cold and expand in the heat). Though re-sizing a ring after purchase is possible for most designs, it's important to know there are some limitations. Feel free to reach out to our experts for additional sizing inquiries or suggestions by ring style.
