**SECTION 4. FIRST-AID MEASURES****Description of first aid measures**

- Ingestion* : Do not induce vomiting. Never give anything by mouth to an unconscious person. If vomiting occurs spontaneously, keep victim's head lowered (forward) to reduce the risk of aspiration. Get medical attention if symptoms persist.
- Inhalation* : Immediately remove person to fresh air. If breathing is difficult, give oxygen by qualified medical personnel only. If breathing stops, provide artificial respiration.
- Skin contact* : If product is sprayed directly on skin, symptoms of frostbite may be experienced including numbness, prickling and itching. Treat for frostbite if necessary by gently warming affected area. If skin irritation occurs: Get medical advice/attention.
- Eye contact* : If product is sprayed directly into the eyes, could cause freezing of the eye. Flush eyes with lukewarm (not hot) water. Remove any contact lenses, and continue flushing for 15 minutes. If eye irritation persists: get medical advice/attention.

**Most important symptoms and effects, both acute and delayed**

- : Not flammable under normal conditions of use. Closed containers are contained under pressure and may explode if exposed to excess heat for a prolonged period of time. Product is a simple asphyxiant. Asphyxiant, can replace oxygen in confined area. May displace oxygen in breathing air and lead to suffocation and death, particularly in confined spaces.

**Indication of any immediate medical attention and special treatment needed**

- : Treat symptomatically.

**SECTION 5. FIRE-FIGHTING MEASURES****Extinguishing media**

- Suitable extinguishing media* : CO2, dry chemical, foam, water spray, water fog.
- Unsuitable extinguishing media* : High volume water jet

**Special hazards arising from the substance or mixture / Conditions of flammability**

- : None known or reported by the manufacturer.

**Flammability classification (OSHA 29 CFR 1910.106)**

- : Not flammable.

**Hazardous combustion products**

- : Carbon oxides ;Hydrogen fluoride

**Special protective equipment and precautions for firefighters**

- Protective equipment for fire-fighters* : Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
- Special fire-fighting procedures* : Firefighters should wear an approved full-face, self-contained breathing apparatus (SCBA) and impervious clothing.

## SAFETY DATA SHEET

### SECTION 6. ACCIDENTAL RELEASE MEASURES

#### Personal precautions, protective equipment and emergency procedures

- : All persons dealing with the clean-up should wear the appropriate personal protective equipment. Restrict access to area until completion of clean-up. Refer to Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.

**Environmental precautions** : Ensure spilled product does not enter confined areas.

#### Methods and material for containment and cleaning up

- : Ventilate the area. Do not enter confined spaces unless adequately ventilated. Leaks in lines to equipment set-ups can be identified by painting suspected sites with soapy water. Leaks can be located by bubble formation. Stop spill or leak at source if safely possible. If leak cannot be stopped, move cylinders to an open space. Isolate the area until all gas has dispersed. Notify the appropriate authorities as required.

#### Special spill response procedures

- : If a spill/release in excess of the EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8802). US CERCLA Reportable quantity (RQ): See section 15.

### SECTION 7. HANDLING AND STORAGE

#### Precautions for safe handling

- : Avoid contact with eyes, skin and clothing. Simple asphyxiant - this product does not contain oxygen and may cause asphyxia in confined spaces. Avoid inhaling gas. Ensure adequate ventilation, especially in confined areas.

**Conditions for safe storage** : Protect from sunlight. Keep containers tightly closed when not in use. Store away from incompatible materials. Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel.

**Incompatible materials** : Strong oxidizing agents ;Alkali metals

#### Exposure controls

##### Ventilation and engineering measures

- : Provide exhaust ventilation or other engineering controls to keep the airborne concentration of vapours below their respective threshold limit value.

**Respiratory protection** : Respiratory protection is required if the concentrations exceed the TLV. Seek advice from respiratory protection specialists.

**Skin protection** : Wear protective gloves. The suitability for a specific workplace should be discussed with the producers of the protective gloves.

**Eye / face protection** : Wear as appropriate: Chemical goggles and face shield are recommended.

**Other protective equipment** : Wear appropriate protective clothing to prevent skin contact, such as coveralls or long sleeved shirt, long pants, and shoes and socks. Wear protective gloves. An eyewash station should be made available in the immediate working area. Other equipment may be required depending on workplace standards.
