# Turf Cell

### Ideal to house and protects grass

The **Turf Cell**<sup>®</sup> reinforcement structure is the most effective product available for both horizontal and vertical root growth.

Unlike concrete systems, the roots remain cool and grass growth thrives. Driving vehicles onto the grass has no effect on the protected roots.

Aesthetically, the product allows the grass to fill in completely, creating a lush lawn with an invisible reinforcement structure.

### Applications

The cells can be used in any situation where low to medium use parking surfaces, access roads and driveways are required.

The cells can also be used for the construction of swales to collect rainwater and direct water to surface infiltration areas such as Atlantis<sup>®</sup> sub surface Infiltration channels.

- Access roads
- Footpath
- Parking bays
- Driveways
