

# SUKIN ANTIBACTERIAL HAND SANITISERS FAQ

---

## **IS THE ETHANOL IN YOUR HAND SANITISER NATURAL?**

Our Antibacterial Hand Sanitiser is made with 70% v/v alcohol derived from natural sources such as wheat, sugarcane and sorghum.

## **WHY DOES YOUR HAND SANITISER CONTAIN ETHANOL?**

Some studies show that ethanol is one of the most efficient ingredients to kill bacteria on hands when its concentration is higher than 60%.

## **WHAT IS THE PERCENTAGE OF ETHANOL IN YOUR HAND SANITISER?**

Our Hand Sanitizer has been formulated with 70% v/v ethanol to ensure that our formula fights bacteria on hands. The 70% v/v means that for every 100ml of product there is 70ml of pure ethanol.

## **DOES YOUR HAND SANITISER KILL 99.9% OF BACTERIA?**

Studies suggest that alcohol-based sanitisers are effective to kill bacteria so long as the concentration is higher than 60%. That is why our Antibacterial Hand Sanitisers contain 70% v/v ethanol.

## **WILL THE HAND SANITISER PROTECT ME AGAINST COVID-19 OR OTHER VIRUSES?**

It is the current government's recommendation that good hygiene is a combination of regular hand washing and the use of hand sanitiser to effectively help prevent the spread of viruses. Sukin's Antibacterial Hand Sanitisers has been formulated with 70% v/v of ethanol, as per recommended, to help protect and reduce the spread of these viruses, germs and bacteria.
