Introduction

Thank you for choosing a Kilotech Scale. We appreciate your business and hope that you will enjoy using your scale. Should you require support, please contact your local dealer from whom you have purchased. Happy Weighing!

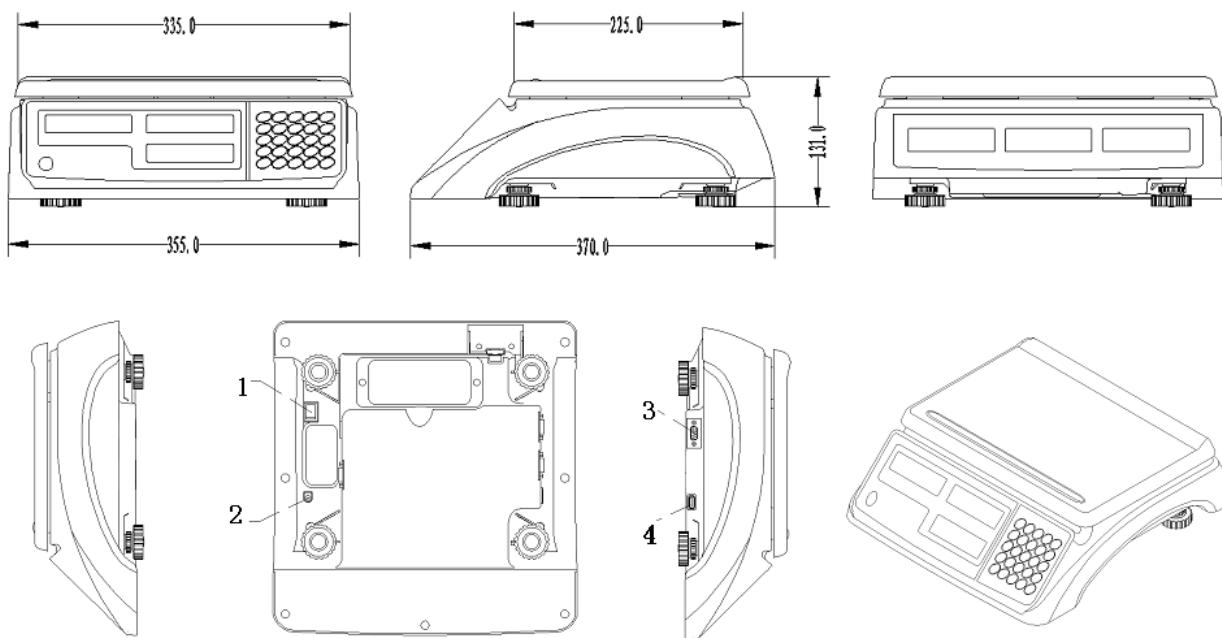

General Precautions

Avoid lengthy exposure to heat or cold.	Allow the scale to acclimate to normal room temperature before use.
Allow sufficient warm up time.	Turn the scale on and wait for a few minutes to allow the internal components a chance to stabilize before weighing.
Do not leave a load or weight on a scale for a prolonged period of time.	
Do not tamper with the scale yourself.	This will void the warranty. Contact your local distributor to properly repair your scale.
Do not dissemble the scale yourself.	This will void the warranty. Contact your local distributor to properly repair your scale.
Do not load beyond max cap the maximum weight limit.	
Do not pull the plug by its cord when unplugging.	
Do not use the scale near fire or corrosive gas.	
Do not spill water or immerse in water.	
Avoid placing the scale near a heater.	It could cause a fluctuation to the indicator reading.
Always make sure to use a Kilotech approved adapter.	
Do not drop the scale or apply a sudden shock.	
Do not drag the scale.	
Avoid exposing to other electromagnetic devices.	These devices emit RF and can cause unstable readings. If your scale should perform poorly, try moving the scale to a different room or location.
Level the scale or make sure it is on an even surface.	A scale used on an uneven surface may provide an unstable reading.
Scale should be used within stated temperature & humidity limits.	

Specifications

Product Number		
Product Name	C15	C30
Capacity	15kg / 30lb	30kg / 60lb
Graduation	0-6 kg:2g/6-15kg: 5g 0-15lb:0.005lb/15-30lb:0.01lb	0-15kg:5g/15-30kg:10g 0-30lb: 0.01lb/30-60lb:0.02lb
Weighing Modes	kg, lb	
Display	0.73",18 digits :6 digit for weight reading, 6 digit for unit price, 6 digit for total price	
Back Light	Yes and adjustable	
Auto Power Off	Yes	
Power	12Vdc ≥500mA with positive center AC adaptor	
Battery	6Vdc4AH lead-acid battery	
Product Dimensions	355 × 370 × 131mm/ 14" x 14.6" x 5.2"	
Platter Size	335 × 225mm / 13" x 8.9"	
Operating Temperature / Humidity	-10° C - 40° C / 14° F - 104° F / <90% RH non condensing	
Unit price range	0.00 - 9999.99 \$/kg or \$/lb	
Total price range	0-999.99\$ (limited by bar code)	
RS232	RS232(optional) USB(virtual RS232,optional)	
Real Time Clock	Yes	
PLU	265 including 5 direct PLU (Addr: 1-5)	
Measurement Canada and NTEP		

Outline

Interface: (1) Main switch (2) AC power adapter input (3-4) RS232 and USB

Unpacking and setup

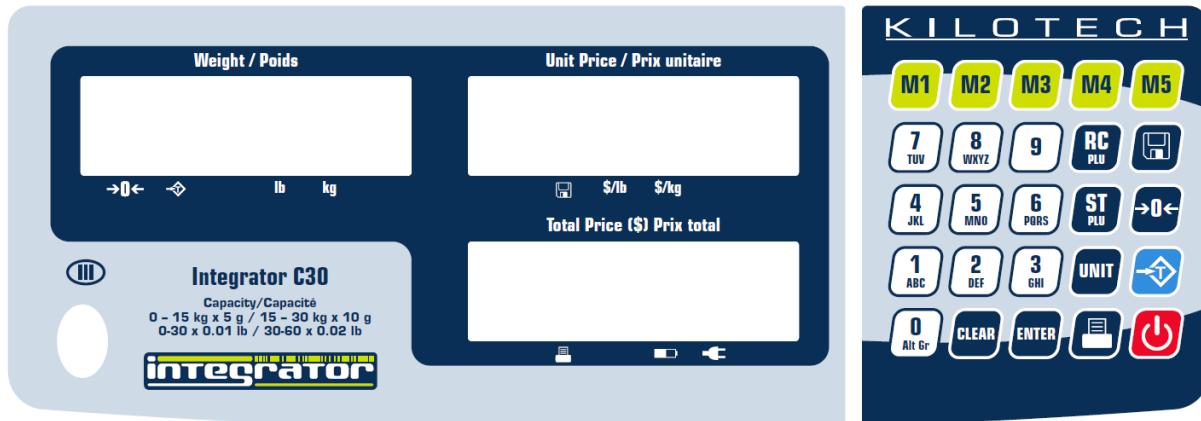

- Remove the scale from the box and place it on a firm, level surface.
 - Avoid locations with rapid temperature changes, excessive dust, moisture, air currents, vibrations, electromagnetic fields, heat or direct sunlight.
 - Adjust the leveling feet until the bubble is centered in the circle of the level indicator (located on the front panel).
- (Correct) (Incorrect)
- NOTE: Ensure that the scale is level each time its location is changed.
 - Before using the scale for the first time, the internal rechargeable battery should be fully charged for at least 12 hours.
 - Connect the supplied AC adapter to the power input receptacle underneath the scale. Plug the AC adapter into a power outlet and the battery will begin charging.
 - If the scale will be stored or transported in the future, save the packaging material to ensure the best possible protection for the scale.

Contents

- Scale
- 6Vdc4AH lead-acid battery (installed in scale housing)
- 12Vdc/2000mA UL adapter with positive center
- Manual

Display and keypad

Faceplate

Symbols on Display

- **WEIGHT** - Weight display window
- **→0←** - Centre-of-zero annunciator
- **△** - TARE annunciator
- **kg/lb** - Weight unit annunciator

- **UNIT PRICE** - Unit price display window
- **💾** - Save mode annunciator
- **\$/kg/\$/lb** - Unit price per kg/lb annunciator

- **TOTAL PRICE(\$)** - Total price display window
- **🖨️** - Data output annunciator
- **🔋** - Charging annunciator
- **🔌** - AC Adapter in-use annunciator

Keypad

: numeric keys, Used to enter numerical data or alphabets

: Direct PLU keys, Used to directly recall the stored unit price

: Clear the recorded data

: Confirm the operation or data entered

: Save the tare weight and/or unit price

: Used to set the scale to zero

: Used to tare the scale.

: Enter program PLU mode

: Enter recall PLU mode

: Transmit data to the communication port

: Used to switch between units

: Turns the scale on and off and functions as exit key in programming mode

Layout and characters

0 Alt Gr	0 space () ÀÂÃÈÉÊË ï ïôùûü	1 ABC	1ABC
2 DEF	2DEF	3 GHI	3GHI
4 JKL	4JKL	5 MNO	5MNO
6 PQRS	6PQRS	7 TUV	7TUV
8 WXYZ	8WXYZ	9	9

Key combinations

Press both key simultaneously and hold down for more than three seconds.

(for details on these operations, please see their respective sections in the manual)

 +  : Used to enter the business's name setup mode

 +  : Used to enter the LCD's contrast setup mode

 +  : Used to enter the auto-off time setup mode

 +  : Used to display A/D inner code or working voltage

 +  : Used to enter RS232 parameters setup mode

 +  : Used to enter the date and time setup mode

 +  : Used to enter Group Code setup mode

 +  : Used to set OS-203/213 Back Feed setup mode

 +  : Used to enter OS-203/213 Origin setup mode

 +  : Enter LCD test mode

Weighing operations

Key functions

Power on/off

- When the scale is off, first make sure the power switch on the bottom of the right hand side of the scale is ON. Press on/off key to power on the scale.
- Press on/off for more than 3s to power off the scale.

Zero

- The zero key is used to zero out the small difference on the weight display.
- The scale will display "Err" when the weight to be zeroed is outside the range
- If a tare is set, the ZERO key function is not available

Tare

- Weight tare: Place the receptacle (box, bowl etc...) on the scale, and when the reading is stable, press tare key to tare the weight.
- Key tare: Key in known tare weight and press tare key.
- To clear Zero or Tare, press their respective buttons.
- The tare weight and unit price will be auto cleared after transaction is completed and item has been removed from the platter.

Save

- When activated, this function will prevent auto clearing of the unit price or tare-weight.
- When active, the save indicator is activated.

Units key

- Use the key to shift between "kg", "lb". Note: Unit price will be set to zero during switching
- You cannot switch units when a tare is active.

Print

- Used to transmit the data over the RS232 or USB. When the price has been computed, press print key output the data via RS232 according to the setting style to make a price label. (see appendix for layout example)

Store/program PLU's

To cancel and return to normal mode at any time, press 

Weight Display	Total Price Display	Unit Price Display	Keys used	Comment
0.00	0.00	0.00	Press  to start	
St.PLU	ADDR		Enter address using numerical keys  To confirm press 	The system will overwrite any previous data The address range is from 1 to 265 1-5 is for direct unit price
St.PLU	NAME		Enter product name using numerical key  To confirm press 	Use the numerical keys to select the letter needed Only the last six characters will show Max length is 20 characters
St.PLU	INGRDT		Enter ingredients using numerical keys  To confirm press 	This field is only visible when activated (Host, PRTd60, PRDnd6) Max 80 characters
St.PLU	LIFE		Enter shelf life using numerical keys  To confirm press 	Refers to shelf life of the product. Max number of days = 253
St.PLU	"Unit.0" (kg) or "Unit.1" (lb)		Use the  key to switch To confirm press 	

Weight Display	Total Price Display	Unit Price Display	Keys used	Comment
St.PLU	UNIT.P		Enter price using numerical keys  To confirm press 	
St.PLU	Tare		Enter tare weight using numerical keys  To confirm press 	
St.PLU	ITEM.C		Enter item code using numerical keys  To confirm press 	If the PLU data has been changed, the unit price window will briefly display "Save" and the total price window will briefly display "Data.ch".

Repeat the steps for the next PLU or press  to return to the normal weighing mode.

Recall PLU

Recall direct PLU

Recall a PLU that is stored under a speed key by pressing **M1** **M5** key, the stored unit price will be displayed in unit price window. The total price window will display “**DUP. xx**”, and then the actual total price will appear.

Recall indirect PLU's

Icon	Weight Display	Total Price Display	Unit Price Display	Confirm or Exit	Comment
	rc.PLU	ADDR	<p>Enter the unit price using numerical keys ~ ie010. The address range is from 1 to 265,</p>	<p>To confirm press </p> <p>To exit and return to regular weighing mode Press </p>	<p>The unit price window will display the recalled unit price. The total price window displays “PLU.xxx”(xxx is the Address) and then will go back to the normal total price displaying mode later, using the new unit price, tare weight, new weight unit, trade name, and shell life)</p>

Miscellaneous transaction

Use the numerical keys ~ , to enter unit price (range: 0000.00~9999.99).

The programmed price can be cleared by pressing the **CLEAR** key.

The unit price will be cleared automatically after weighing and removing the objects.

Parameter setting

To cancel and return to normal mode at any time, press the  key

Business name

Weight Display	Total Price Display	Unit Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	
bUSI.N1		XXXXXXXXXXXX	Enter first line of Business name using numerical key  ~  To confirm press 	Displays the last 12 characters Max length is 20 characters
bUSI.N1		XXXXXXXXXXXX	Enter second line of Business name using numerical key  ~  To confirm press 	

LCD contrast

Weight Display	Total Price Display	Unit Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	
Setup	LCd.CST	X	 ~  To confirm press 	X = value currently set
Setup	BLGT.MD	X	 ~  To confirm press 	0 = always on 1 = always off 2 = Automatic

Auto off

Weight Display	Total Price Display	Unit Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	
Setup	A.OFF.t	XX	 ~  To confirm press 	XX = value currently set in minutes Max delay = 30 min 00 = auto off disabled

Internal code

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	
UoL.x.x	CodE	xxxxxx	To continue press 	UoL.x.x = working voltage Code = A/D internal count

Communication settings

To cancel and return to normal mode at any time, press the  key

The settings in bold are default

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	
Setup	232.out	xxxxxx	Chose format using numerical keys  ~  To confirm press 	Communication format options. 0 = HOST: 1 = PRTd40 2 = PRTd60 3 = PRTnd4 4 = PRTnd6 (see appendix for details)
Setup	232.bps	xxxxxx	Choose baud rate using numerical keys  ~  To confirm press	baud rate options 1 = 1200bps 2 = 2400bps 3 = 4800bps 4 = 9600bps 5 = 19200bps

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
Setup	232.dFt	XXX	<p>Choose parity rate using numerical keys ~ </p> <p>To confirm press </p>	Parity options 1 = 8N1 2 = 7O1 3 = 7E1

Setup	B.PRT.FT	XXXX	<p>Choose format using numerical keys ~ </p> <p>To confirm press </p>	0 = 5I4P 1 = 4I5P 2 = 5I5P 3 = 4I6P See Appendix for details barcode formats
Setup	USb.oUt	XXXX	<p>Choose format using numerical keys ~ </p> <p>To confirm press </p>	0 = None USB disabled 1 = Host, USB activated .
Setup	Usb.bps	XXXXX	<p>Choose baud rate using numerical keys ~ </p> <p>To confirm press </p>	baud rate options 1 = 1200bps 2 = 2400bps 3 = 4800bps 4 = 9600bps 5 = 19200bps

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
Setup	Usb.dft	XXX	Choose baud rate using numerical keys  ~  To confirm press 	Format options 1 = 8N1 2 = 7O1 3 = 7E1
Setup	Urt.CFt	XXX	Choose format setting using numerical keys  ~  To confirm press 	0 = None 1 = SN Data will be transmitted when the print key is pressed and scale is stable

The system will automatically reboot after changing the above parameter settings

Set date and time

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	.
Setup	dAtE	xx.xx.xx	Enter date using numerical keys  ~  To confirm press 	format: YY.MM.DD
Setup	timE	xx.xx.xx	Enter time using numerical keys  ~  To confirm press 	Format: hh.mm.ss

Group code

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	
Setup	GroUP.C	XX	Enter time using numerical keys  ~  To confirm press 	Default = 00 Range = 00~99

Back feed

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	
Setup	bAk.FEd	XXXXXX	Choose mode using numerical keys  ~  To confirm press 	Printer must be on and connected 0 = disable 1 = enable

Origin setting

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  +  simultaneously and hold down for more than three seconds	
Setup	orG	XXX	Set value using numerical keys   ~  To confirm press 	Range = 0-255

LCD test

Weight Display	Unit Price Display	Total Price Display	Keys used	Comment
0.00	0.00	0.00	Press both  and simultaneously and hold down for more than three seconds Press  key to exit	

Format of barcode for printing

No.	Format	Type	1	2	3	4	5	6	7	8	9	10	11	12	13
0	5I4P	EAN13	G	G	I	I	I	I	I	S	P	P	P	P	C
1	4I5P	EAN13	G	G	I	I	I	I	S	P	P	P	P	P	C
2	5I5P	EAN13	G	G	I	I	I	I	I	P	P	P	P	P	C
3	4I6P	EAN13	G	G	I	I	I	I	P	P	P	P	P	P	C

NOTE: If the fields ("Price" and "Item code") are greater than the parameters set, "OUT.P.R" (indicates it is out of printing range) will appear in the weight window.

i.e. you enter 5 digits in a field that needs to be 4 digits.

G: Group Code;

I: Item Code;

S: Check-sum for price;

P: Total Price (If the weight window displays zero, it will be the unit price);

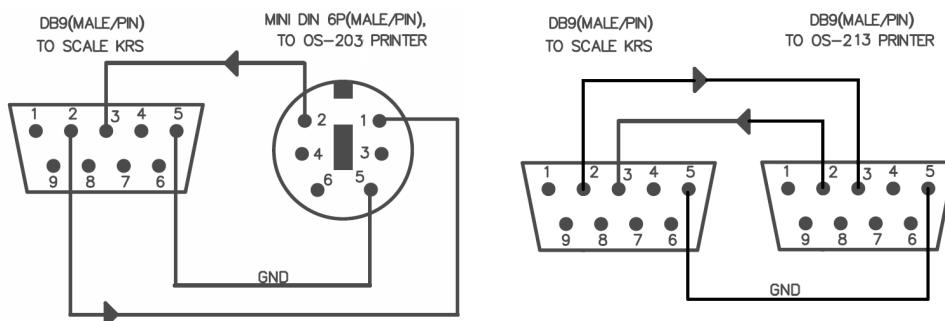

C: Check-sum for all characters;

RS-232 cable pinout for host

SCALE	CABLE(9 pins)		HOST

NOTE: PIN4 and PIN6, PIN7 and PIN8 are shorted in the scale

Printer cable pinout (OS-203/213)

Error codes

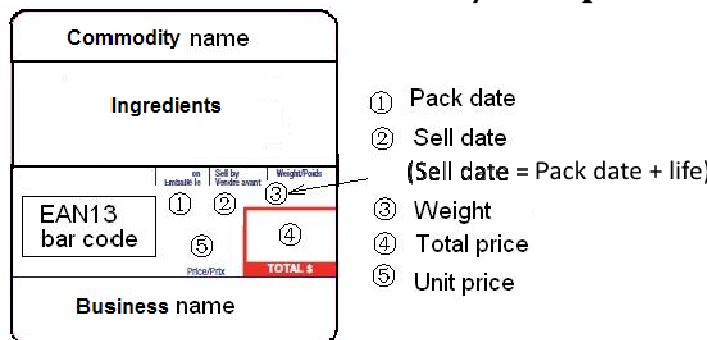

- Err01:** The weight signal is too large.
- Err02:** No proper data can be displayed.
- Err03:** The weight signal is too small.
- Err04:** Zero point is over the setting range.
- Err05:** Zero point is below the setting range.
- Err06:** Error in unit key operation.
- Err10:** The EEPROM can't be accessed.
- Err11:** The parameters are not same with backup data.
- Err12:** The setting parameter(s) is not in normal range.
- Err20:** There is an error in calibration.
- Err30:** ADC is over max. range.
- Err31:** ADC is below min. range.
- Err40:** Recall error, no content stored.
- CAP.:** Capacity.
- UOL.:** Voltage.
- St.PLU:** To set and store the indirect unit price.
- ADDR. :** PLU address.
- Unit:** Weighing unit selecting.
- Rc.PLU:** Recall indirect unit price.
- OUT.P.R:** Data is out of printed barcode range.
- Data.ch:** Data has been changed.
- Save:** Data is being saved.
- O.RANGE:** The data has been entered or the weight for tare weight is out of range.
