

XTI 903W

Wireless Foot Control

The XTI 903W is a high-performance foot control that connects wirelessly to the power source using Bluetooth technology. The XTI 903W foot control works seamlessly within 10 metres of the power source, the wireless technology allows more freedom for positioning the foot control and eliminates the trip hazards associated with cable-mounted foot controls. Excellent battery life ensures three days of continuous working and five days in standby mode. Each foot control comes with a paired Bluetooth receiver which connects to the torch socket on the front of the power source.

KEY FEATURES

- ▶ Wireless
- ▶ 10 metre operating range
- ▶ Works with our TIG, MIG and Multi-process machines
- ▶ Long lasting battery life
- ▶ No cables
- ▶ Trip hazards avoided

** Please note that the XTI 903W is compatible with Parweld machines of serial number 2206 or higher. Older machines can be upgraded, so please contact sales for further details.*
