

Z-series

Quick-Start Guide

Step 1: Fully Charge Battery

Slip safety covers off of battery terminals. Note that it's not necessary to remove **battery wire harness**. Attach charger to battery, plug charger in, and turn it on. Red light will illuminate when charger is powered on. Amber light will show when battery is charging and will turn green when battery is fully charged.

Step 2: Attach Drive Wheels

- Remove **protective covers** from main axle.
- On inside of **drive wheels**, locate and pull **wheel tab**.
- Place each wheel on axle, aligning drive pins on axle with holes in wheel panel.

Pulling wheel tab.

Inserting wheel on axle.

Step 3: Attach Steering Structure

- Open **draw latch** under **battery tray**.
- Insert **steering structure** into hole in front of battery tray and secure draw latch.
- Attach wire plug from steering structure to receptacle on Z-box as shown.

Steering Structure being inserted into chassis.

Plug in electrical connection to Z-box.

Step 4: Attach Handle Assembly

- Open **draw latch** on top of **chassis**.
- Insert **handle assembly** into hole and secure draw latch.
- Attach wire plug to receptacle on backside of Z-box.
- Remove three plastic tie-wrap bands from handle.

Attaching **handle assembly** to chassis.

Attaching wires.

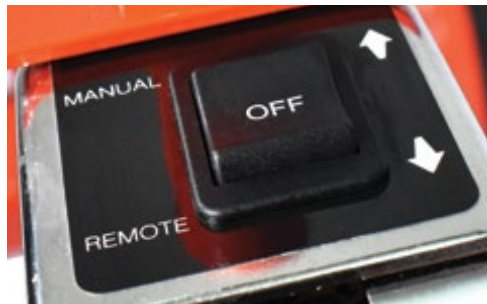

Step 5: Manual Operation

Before putting your bag on caddie and hitting the links, practice using manual and remote operation.

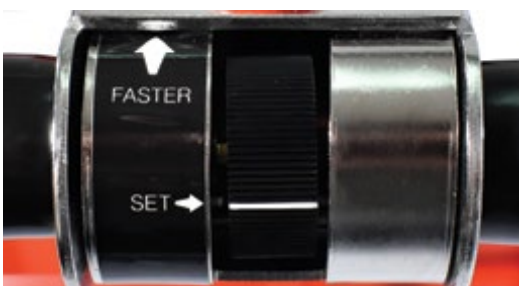

- SET FUNCTION SWITCH TO OFF.
- Place battery on battery tray and plug **battery wire harness** into the **chassis power port**.
- **Manual Operation:** Set speed control at white line (slow), set the function switch to **MANUAL**, and slowly increase speed.

Connecting the **battery**.

Function Switch

Speed Control

Step 6: Remote Control

- To use remote control mode, toggle **function switch** to **REMOTE** and set **speed control** to desired setting.
- **GO:** Caddie will travel at set speed.
- **FAST:** Caddie will travel at top speed. Press **GO** to return to set speed.
- **LEFT** (Looking from behind caddie): Front wheel will turn left. Releasing button re-centers wheel.
- **RIGHT** (Looking from behind caddie): Front wheel will turn right. Releasing button centers wheel.
- **STOP** (Looking from behind caddie): Caddie will stop. Red light blinks to confirm command.

For safety reasons, caddie will automatically shut off if no command is given within **20** seconds.

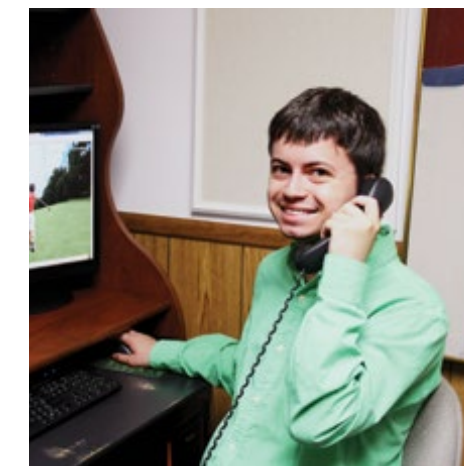

Step 7: Load Your Golf Bag

Upper bag support is adjustable. Secure bag with strap and buckle.

Go Play Golf!
