Add Manually -wifi device - default mode NO.3.2.1

- proceed to the next step
- to view the instructions

1. The app supports two configurations: Default mode and AP mode. Click "AP Mode" at the top right corner of the "Default mode" page to switch between modes

2. To select "Default mode", please make sure the indicator light on the smart device is flashing rapidly (blinking twice per second) and then click the button to

3. If the indicator light is not flashing rapidly, click "H elp"

NO.3.2.1 Add Manually -wifi device - default mode

Notes: How to set indicator light to rapid flashing:

Step 2 / 3

Turn on-off-on-off-on

(Keep time interval not too short, turn off after light is on)

Add Manually -wifi device - AP Mode NO.3.2.1

- sure the indicator light on the smart device is flashing slowly and then click the button to proceed to the next step.
- slowly, click "Help" to view the instructions.

1. To select "AP Mode", please make (blinking once every three seconds)

2. If the indicator light is not flashing

NO.3.2.1

Add Manually -wifi device - AP mode

Notes: How to set indicator light to slow flashing:

NO.3.2.1 Add Manually -wifi device - Enter wifi password

In a selected mode, clicking confirm button
on the page when the indicator light flashes
rapidly/slowly will bring up the page shown
in Fig. 1.
Select the Wi-Fi in the work area of a device
that can enable successful Internet
connection, enter the Wi-Fi password, and
click "OK" to proceed to configuration.

Add Manually wifi device-Configuration NO.3.2

If default mode is selected, app configuration will be completed as shown in Fig. 1. Successful configuration will appear as shown in Fig. 2. Names of devices that have been configured successfully can be changed, and the locations of the rooms where the corresponding devices are can be selected.

NO.3.2.1

Add Manually -wifi device - Configuration

When in AP (slow flashing) Mode, you can select hotspot configuration, and connection must be made with the Wi-Fi hotspot whose name begins with "SmartLife", as shown in the figure Note: Some hotspot names may be user-defined

NO.3.2.1 Add Manually -wifi device - Configuration

Connect to the specified hotspot and then return to the configuration menu to proceed with configuration. The process in the app will be completed, as shown in Fig. 1. Successful configuration will appear as shown in Fig. 2

NO.3.2 Add Manually– wifi device-Failure

If configuration fails, it will appear as shown in the figure. You can choose to click "Gotit" to add again or go to "Help" for troubleshooting assistance.

Add Manually -- ZigBee Device NO.3.2.2

When adding zigbee devices, gateway should be added first

- 1. Plug in a gateway and use a networking cable to connect to the router.
- 2. Make mobile phone and gateways under the same network environment.
- 3. Click the button of "Add Device" on the home page, as shown in figure 1. Click the "Gateway (ZigBee)" under the category of
- "Others". Confirm that the indicator for distribution turns green and click "Bind" to enter the adding process, as shown in figure 5

	Fia. 1			Fic	a. 2			Fig. 3			

NO.3.2.2 Add Manually --ZigBee Device

After a gateway has been added successfully, go to the gateway page, click "Add subdevice" and select the matching device to add other devices under the same gateway, in the same way as in 3.2.

NO.3.2.3 Search Device

Search devices: multiple search modes are triggered at the same time, including searching wifi devices found in the network free of distribution, bluetooth gateway, bluetooth devices, zigbee gateway and zigbee devices under the existing gateway.

NO.4 Control Devices - Individual Control

When devices have been configured successfully, the smart devices will appear on the home page. Click to open the control panel for smart devices.

Note:

1. When devices are online, some will support use of hotkeys. Click "Common Functions" to use them 2. When devices are offline, they will appear as "Offline" and will not be

available for use

NO.4.1 Control Devices - Individual Control

Open the control panel for devices. For example, Fig. 1 shows the light is off, and only the timer can be accessed in the off mode. Fig. 2 shows the light is on, and scene, color, brightness, and schedule can be configured in the on mode. Click "..." at the top right corner of the control panel to manage individual devices.

¢	Control smart devices	
All d	levices Living Room Bedroom	
Ŧ	TY-CW-vdevo Group	>
Ŧ	TY-CW-vdevo 群组	>
Ŷ	Color Lights	>

Add action:

Click "Add action" or "+" at the top right corner to open the menu, as shown in Fig. 1. There are four types of actions: execute scene, trigger automation, send a reminder and time-lapse.

NO.5.1 **Smart Features - Automation**

Valid Time Period:

you can set a valid time period for automation. For example, if you define a scene where the nightlight automatically lights up when the human motion sensor detects human presence, you can select "Night" as the valid time period. In this case, the nightlight will not automatically turn on in the daytime.

Smart Features - Automation NO.5.1

Conditions and actions of automation can all be set up as shown in Fig. 1. The system primarily supports three types of automation: Inter-device synchronization: such as turning on the aroma diffuser and air purifier automatically at the same time the A/C unit is turned on.

External environment and device 2. synchronization: such as turning on the A/C unit automatically when the temperature falls below 0°C. 3. Timed actions: such as drawing back the curtains drawn automatically at 8:00 am every morning.

NO.5.2 **Smart Features - Scene**

In figure 1, select the scene and enter the Settings page. As shown in figure 2, you can edit the scene name. Click "Add actions" or "+" in the top right corner to add the execution action. The action menu is shown in Fig. 3. Configuration is similar to that of automated devices. In addition, you can use siri to trigger the scene.

Ŧ	TY-CW-vdevo	>
	开关-vdevo	>

NO.5.2 Smart Features - Scene

To configure a scene with "Trigger automation", you must set up an automated scene in advance. If existing automation options are available as shown in Fig. 1, select "Enabled after triggering" or "Disable after triggering". Then, click "Next" and enter scene name, and click "Save" at the top right corner to finish configuration.

Smart - add/modify/delete NO.5.3

Previously configured automation and scenes are displayed in the "Intelligent" page. Click "Edit Automation" at the top left corner to modify existing scenarios and automated devices. For example, click "Update Scene" to go to the page shown in Fig. 2, where the order of scenes can be changed and can be deleted by sliding left. (In iOS, click "-" on the left of scenario name to delete.)

NO.5.3 **Smart - add/modify/delete**

Edit a scene: Click "..." as shown in Fig. 1 to go to the Edit page. Edit automation: Click anywhere on the background of automation, as shown in Fig. 1, to go to the Edit page. Go to the automation edit page shown in Fig. 2. Slide left to delete previously added conditions or actions, add new conditions or actions, or delete the smart feature entirely.

At the same time, the message center can also set up an uninterrupted period. Click "Settings" in the top right corner to enter the Settings page. First turn on the button of "Do Not Disturb", and then set the do not disturb time segment and device. After successful setup, you will not receive messages during the do not disturb period.

1. Alarm messages include: device alarm, automatic message notification, alarm alarm, device timing failure, etc.;

2. Family messages include: add family member, remove family member, dismiss family, set family member as administrator, add device, share device,

3. Notification messages include: status update of feedback, official message push, etc.

NO.7 Personal-Modify Login Password

Click "Gesture unlock" to set up a gesture password. Once a gesture password is activated, you will have to use the gesture to access the app. If you forgot your gesture password, click "Forgot the gesture password" to have an authentication code sent to your registered mobile phone number or your email. Enter the code and set up a new gesture password to continue.
