VANGUARD STEEL LTD.

This is

# VANGUARD STEEL LTD.

at your service

Since 1960, Vanguard Steel Ltd., a sister Company of Ringball Corporation, has been supplying specialty steels and steel products to North American Industries.

By representing some of the most reputable manufacturers around the Globe, Vanguard's various Product Divisions offer a wide range of North American, European and Asian products, many of which are being manufactured to Vanguard's own specifications and often exceed Industry Standards.

Besides office and warehousing facilities throughout Canada, Vanguard Steel relies on a vast network of Canadian and U.S. Distributors to assure local product availability and best possible service.

## VANGUARD'S PRODUCT DIVISIONS:

- **SPECIALTY STEELS**
- **WIRE ROPES, CABLES AND RELATED HARDWARE**
- **CHAINS AND ACCESSORIES**
- **BUILDERS HARDWARE**
- **INDUSTRIAL KNIVES**
- **ABRASIVES**
- **WELDING CONSUMABLES**

# GENERAL INFORMATION

## PRODUCT MARKINGS/SYMBOL DEFINITIONS

	Do not use if damaged		Follow all protective measures
	Follow all safety instructions		Not suitable for grinding
	Suitable for cutting		Suitable for grinding
	Finish/Sanding products		Only use for stationary cutting
	For use with a die grinder		Suitable for gas/power saw cutting
	Flap disc products		Extremely quick cutting or grinding
<b>Metal</b>	Suitable for metal applications	<b>Stainless</b>	Suitable for stainless applications
<b>Aluminum</b>	Suitable for aluminum applications	<b>Non-Ferrous</b>	Suitable for non-ferrous applications
<b>Concrete/Masonry</b>	Suitable for concrete applications	<b>Asphalt</b>	Suitable for asphalt applications

## PACKAGING/SHIPPING POLICIES

All Superflex abrasives are sold in full box quantities only, to help ensure that all products are delivered in good working order. It is still important that all materials are inspected when received and before shipping or using.

If any discs/products appear to be cracked or show signs of abuse DO NOT use/ship these discs.

## WARNINGS AND INFORMATION

Nearly half of all accidents involving abrasives are caused by unsafe practices and usage by the operator.

By following minor precautions we can all prevent the risk of serious injury, damage or even death.

# Do's

### The use of common sense is your best defense

- Make sure to disconnect power tools prior to changing abrasives or wire brush products
- Inspect abrasives and wire brushes before use, if they appear to be damaged DO NOT use them
- Make sure that the operating speed of the tool does not exceed the Maximum R.P.M's. of the abrasive or wire brush
- Make sure that the clamping hardware properly centres and secures the abrasive or wire brush to the tool while still providing the required support
- Make sure that the material being worked on is properly secured
- Follow all safe guards indicated on the label
- Wear approved protective eye wear (safety glasses or face shields), body, ear and dust inhalation protection
- Ensure that the work area is clear/free of any obstructions and that it is safe for both the operator and other worker in the vicinity
- New abrasive and wire brushes should be allowed to run at the operating speed for up to a minute to ensure product and equipment safety
- If coolant is being used make sure to turned it off before stopping the wheel to prevent creating an out of balance condition

# Don'ts

Abrasives and brushes run at extremely high speeds.

Particles of these products can break loose if damaged risking the possibility of serious injury, damage or even death.

- Use an abrasive product or wire brush that shows signs of abuse or damage
- Force an abrasive or wire brush onto the tool, they should mount without requiring excessive force
- Exceed the abrasive's or wire brushes rated Maximum R.P.M.
- Use cutting discs for grinding unless clearly indicated otherwise
- Use an abrasive or wire brush product on a tool that it was not designed for

## LIFETIME PLUS PACKAGING

### What is *Lifetime Plus* and why do I need it?

All abrasives undergo a natural ageing process during storage, which is caused by the absorption of humidity found in the air by the disc.

*Lifetime plus* packaging creates a seal that keeps the moisture out preventing this ageing process from starting before the discs are needed.

Abrasives can lose up to 30% of their service life after just 6 weeks.

### Benefits of *Lifetime plus* packaging:

- Increase service life by up to 30%
- Prevents the natural ageing process of synthetic resin-bonded discs before discs are needed
- The sealed metal tin protect the discs from the moisture in the air and from damaged during storage and/or transportation
- Packaged in recyclable metal tins

Results from service life (number of cuts) comparisons between discs stored in a proper (clean, dry) environment for 6 weeks and discs stored using the lifetime packaging.

# CUTTING DISCS

## AS46V LIFETIME PLUS

Metal

Stainless

This high performance disc offers very quick cutting times and an extremely long service life. It has been engineered to reduce vibration and minimal effort is required while cutting, making it easier on both the operator and equipment.

An excellent choice when cutting sheet steels and thin-walled tubing.

- Very good cutting speed and an unmatched service life
- Versatile disc designed to provide contamination free cutting of stainless steel, carbon steel, tool steels, aluminum, copper, brass and bronze
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

## AS60V LIFETIME PLUS

Metal

Stainless

This top performance disc provides extremely quick cutting times and an excellent service life. The AS60V Gold disc is designed to cut thin sheet metal, steel cable, thin walled metal profile sections and pipe made of stainless steel or non-ferrous metals. It is also well suited for cutting fibre reinforced plastic (FRP) and high temperature metals commonly found in turbines.

- Extremely quick clean cuts and an very good service life
- Precision cool cutting (accurate to the millimeter) ensures burr free cutting
- Versatile disc designed to provide contamination free cutting of stainless steel materials, also well suited when cutting carbon steel tool steels, and high alloy steel
- Limited suitability when cutting aluminum, aluminum alloy or non-ferrous metals
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

Dimensions (Diameter x Thickness x Bore)	Vanguard Code		Max. R.P.M. 80m/Second	Standard Packaging
	AS46V GOLD	AS60V GOLD		
4-1/2 x .040 x 7/8"		7385 1445	13,280	10 / 100
4-1/2 x 1/16 x 7/8"	7385 1465	*	13,280	10 / 100
5 x .040 x 7/8"		7385 1545	12,200	10 / 100
5 x 1/16 x 7/8"	7385 1565	*	12,200	10 / 100
6 x 1/16 x 7/8"	*	*	10,200	25
7 x 1/16 x 7/8"	*	*	8,600	25

\* Available upon request, minimum order quantity may apply

## AS46 Inox

Metal

Stainless

The AS46 Inox disc requires a minimal amount of effort and it produces very little vibration while cutting, making it easier on both the operator and equipment.

This disc offers very quick cutting speeds and a very good service life at an economical price.

- Very good cutting speed and service life
- Virtually no burrs are produced when cutting
- Versatile disc designed to provide contamination free cutting of stainless steel, carbon steel, tool steels and high alloy steel
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

## AS60 Inox

Metal

Stainless

This very thin disc 1.0mm (0.040") offers a very quick and clean cut. A minimal amount of force is required allowing the disc and machine to do all of the work.

Precise to the millimeter this disc offer vibration free cutting without causing thermal bluing or burrs.

- Excellent cutting speed and a good service life
- Versatile disc designed to provide contamination free cutting of stainless steel, also well suited when cutting carbon steel, tool and high alloy steel
- Limited suitability when cutting aluminum, aluminum alloy or non-ferrous metals
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

Dimensions (Diameter x Thickness x Bore)	Vanguard Code				Max. R.P.M. 80m/Second	Standard Packaging

# CUTTING DISCS

## CS46 Alu Special

Aluminum

Non-Ferrous

The CS46 Alu disc has been specially engineered to offer the maximum safety and performance for larger diameter discs (6 to 9") when cutting aluminum.

The special formula of this disc makes it the ideal product when cutting aluminum, aluminum alloys and non-ferrous metals.

- Very good cutting speed and an excellent service life
- Will not clog or load up
- Specially engineered to cut aluminum, aluminum alloys, non-ferrous metals such as copper brass and bronze
- Also well suited for most synthetic materials

## CS60 Alu Special

Aluminum

Non-Ferrous

The CS60 Alu discs is very thin disc 1.0mm (0.040") which offers an extremely quick clean cuts. A minimal amount of force is required when cutting allowing the disc and machine to do all of the work.

The special formula of this disc makes it the ideal product when cutting aluminum, aluminum alloys and non-ferrous metal.

- Excellent cutting speed and service life
- Will not clog or load up
- Specially engineered to cut aluminum, aluminum alloys, non-ferrous metals such as copper brass and bronze
- Also well suited for most synthetic materials

Dimensions (Diameter x Thickness x Bore)	Vanguard Code		Max. R.P.M. 80m/Second	Standard Packaging
	CS46 Alu	CS60 Alu		
4-1/2 x .040 x 7/8"		7333 0445	13,280	25
5 x .040 x 7/8"		7333 0545	12,200	25
6 x 1/16 x 7/8"	*		10,200	25
7 x 1/16 x 7/8"	7333 0766		8,600	25
9 x 5/64 x 7/8"	*		6,600	25
7 x 1/16 x 7/8"		*	8,600	25

\* Available upon request, minimum order quantity may apply

## AS46T MINI

Metal

The AS46T mini cutting discs offer a means of reaching very tight areas. It can be used for high speed cutting, notching and grinding.

The special formula of this disc makes it very well suited when working on thin sheet steels, construction steel, tool steels and high speed steels.

- Very quick cutting and a good service life
- Ideal for flush cutting
- Versatile disc designed to cut carbon steels and tool steels

Dimensions (Diameter x Thickness x Bore)	Vanguard Code AS46T	Max. R.P.M. 80m/Second	Standard Packaging
3 x 3/64 x 3/8"	7383 7610	16,500	50
3 x 1/16 x 3/8"	7386 1616	16,500	50
3 x 1/8 x 3/8"	7383 7630	16,500	50
3 x 5/16 x 3/8"	7383 7680	16,500	50

## AS30T CIRCULAR SAW

Metal

These AS30T discs are designed to run on circular saws, enabling the user to cut sheet metal without contouring the materials or producing burrs.

- Quick cutting speeds and a very good service life
- Well suited when cutting carbon steels, tool steels, solid materials, angular steel and tube steel

Dimensions (Diameter x Thickness x Bore)	Vanguard Code AS30T	Max. R.P.M. 80m/Second	Standard Packaging
7 x 3/32 x 5/8"	7380 0700	8,600	25
7 x 3/32 x 7/8"	7380 0706	8,600	25
8 x 3/32 x 5/8"	7380 0600	7,600	25

# FREE HAND CUT OFF DISCS

## A24R

Metal

This disc offers very quick cutting times and a good service life, ideal for both industrial and do-it-yourself applications.

- Very quick cutting speeds
- Good service life
- Economical pricing
- Well suited when cutting carbon steels, tool steels, solid materials, angular steel and tube steel

## AS30S - HT GOLD

Metal

Aluminum

Non-Ferrous

This disc contains high temperature corundum and a very balanced bonding. The unique formula offers the aggressive cutting performance of a very soft disc, as well as the excellent service life you would expect from a much harder disc.

- Very quick cutting speed
- Excellent service life
- Well suited when cutting carbon steels, tool steels, rails, cast, non-ferrous metals, angular and tube steel

Dimensions (Diameter x Thickness x Bore)	Vanguard Code		Max. R.P.M. 80m/Second	Standard Packaging
	A24R	AS30S - HT GOLD		
4 x 1/8 x 5/8"	7305 0308	7335 0408	15,250	25
4-1/2 x 1/8 x 7/8"	7300 0408	7335 0508	13,280	25
5 x 1/8 x 7/8"	7300 0508	7335 0608	12,200	25
6 x 1/8 x 7/8"	7300 0608	7335 0708	10,200	25
7 x 1/8 x 7/8"	7300 0708	7335 0908	8,600	25
9 x 1/8 x 7/8"	7300 0908	7335 0408	6,600	25

## AS30 INOX

Stainless

Metal

Aluminum

Non-Ferrous

This unique formula of this disc allows for contamination free cutting of stainless steel materials while also making it an excellent choice for an extremely wide range of other materials.

- Very quick cutting speed and an excellent service life on stainless materials
- Contamination free cutting of stainless steel materials
- Well suited for cutting a wide range of materials which include carbon steels, tool steels, rails, cast and non-ferrous metals, sheet steel, angular and tube steel
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

## AS30 Alu SPECIAL

Aluminum

Non-Ferrous

The special composition of this disc prevents clogging when used to cut aluminum, aluminum alloys and non-ferrous metals. This ensures a very good service life and cutting speeds.

- Very good cutting speed and an excellent service life
- Will not clog or load up
- Specially engineered to cut aluminum, aluminum alloys, and non-ferrous metals

Dimensions (Diameter x Thickness x Bore)	Vanguard Code		Max. R.P.M. 80m/Second	Standard Packaging
	AS30 Inox	AS30 Alu		
4 x 3/32 x 5/8"	*		15,250	25
4 x 1/8 x 5/8"		*	15,250	25
4-1/2 x 3/32 x 7/8"	7330 0406		13,280	25

# CUT + GRIND DISCS

## AS46/30T INOX

Stainless

Metal

Aluminum

Non-Ferrous

The AS46/30T Inox Extra Thin Cut + Grind disc allows the operator to cut at a comfortable speed then deburr, chamfer and grind immediately without changing the disc.

Eliminating disc change over and the need to stock multiple discs to perform these tasks saves both time and money.

- Cutting and light grinding with one disc
- Good cutting speed, grinding capacity and a very good service life
- Three layers of reinforcement guarantee operator safety when grinding
- Complies with the prescribed lateral load for grind discs of 290N
- Can be used when cutting both solid materials and profiles
- Very versatile disc can be used on carbon steel, tool steel, stainless steel, high tensile alloys and cast
- Limited suitability for aluminum, brass and bronze materials
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

Dimensions (Diameter x Thickness x Bore)	Vanguard Code AS46/30T Inox	Max. R.P.M. 80m/Second	Standard Packaging
4-1/2 x 3/32 x 7/8"	7384 0406	13,280	25
5 x 3/32 x 7/8"	7384 0506	12,200	25
6 x 1/8 x 7/8"	*	10,200	25
7 x 1/8 x 7/8"	*	8,600	25

\* Available upon request, minimum order quantity may apply

## AS30S PIPELINE

Metal

Aluminum

Non-Ferrous

Triple reinforced to guarantee the maximum possible safety when grinding, notching and/or cutting. A proven performer on pipelines throughout the world.

- Very quick cutting times and an excellent service life
- Excellent stock removal and service life when grinding
- Available with thread 5/8-11NC hub
- Excellent choice for carbon steel, welding seams, cast and non-ferrous metals

Dimensions (Diameter x Thickness x Bore)	Vanguard Code AS30S Pipeline	Max. R.P.M. 80m/Second	Standard Packaging

### AS30S

Metal

Aluminum

Non-Ferrous

These ranges of discs can be used to grind very aggressively at less than 15° reducing the amount of strain operator experience during the grinding. The unique shape also allows for greater/wider contact area during operation.

- Good stock removal rate and a long service life
- Medium – Hard bonding for heavy applications
- An excellent alternative to cup stones
- Very versatile disc can be used on a wide range of steels, tool steel, welding seams and cast

Dimensions (Diameter x Thickness x Bore)	Vanguard Code AS30S 	Max. R.P.M. 80m/Second	Standard Packaging
7 x 1/4 x 7/8"	7381 0716	8,600	10
9 x 1/4 x 7/8"	7381 0900	6,600	10

## A24 30P

Metal

Our number one selling disc is distinguished by its' excellent quality, long life and affordable price. Millions of these grinding discs have been used by in both industrial and do-it-yourself applications.

- Soft disc offering very quick stock removal
- Good service life and stock removal capacity
- Suitable for grinding welding seams, tool steels and steel materials
- Economical pricing

## AS30R GOLD

Metal

Aluminum

Non-Ferrous

This “universal” range of discs offers excellent stock removal capacity and service life. It can be used on extremely wide range of materials problem free, including carbon steel, cast and non ferrous metals.

- Medium-hard bonding
- Very quick stock removal
- Excellent service life and very good stock removal capacity
- Very versatile disc can be used to grind carbon steels, tool steels, cast, aluminum, non-ferrous metals such as copper, brass and bronze

# FREE HAND GRINDING DISCS

## AZ30S EVOLUTION

This special range of disc distinguishes itself by offering outstanding stock removal capacity, speed and service life.

Minimal effort is required making this disc easy on both the operator and the machine.

- Zirconium corundum, medium-hard disc
- Very quick stock removal and an excellent service life
- Extremely versatile disc can be used to grind carbon steels, tool steels, cast, stainless steel, aluminum and non-ferrous metals such as copper, brass and bronze
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

Stainless

Metal

Aluminum

Non-Ferrous

## AS30S INOX SPECIAL

The AS 30S Inox disc has been engineered to offer excellent stock removal capacity and service life on stainless steel applications.

It is also well suited for a wide range of other materials including both carbon steel and non-ferrous metals.

- Very quick stock removal and an excellent service life
- Medium-hard bonding make this disc ideal for heavy grinding operations on stainless steel surfaces
- Extremely versatile disc can be used to grind carbon steels, tool steels, cast, aluminum, copper, brass and bronze
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

## AS46 ALU SPECIAL

The AS46 Alu discs has been engineered to grind aluminum and other non-ferrous metals without clogging or loading up. The unique formula ensures very quick stock removal and an excellent service life.

- Very quick stock removal
- Excellent service life
- Will not clog or load up
- Ideal for use on aluminum, copper, brass, bronze and cast materials

# SEMI FLEXIBLE GRINDING DISCS

## AS36 TX EVOLUTION

- Stainless
- Metal
- Aluminum
- Non-Ferrous

This AS36 TX semi flexible grinding disc provides the extremely aggressive stock removal of a premium quality grinding disc, and the surface finish a flap disc.

This disc uses the latest technology in grinding with advanced ceramic aluminum oxide minerals. It is extremely light with (a thickness of either 3 or 4mm depending on the disc diameter) and very little force is required to get the maximum performance that this disc can offer

This versatile disc is designed for preparation or removal of welding seams, removal of spatter, descaling, heavy deburring, grinding and/or snagging.

- The use of 3M™ Cubitron ensures extremely high stock removal rates and service life
- The flexible structure of this light weight disc produced less noise, dust and vibration
- Minimal force required making this disc easier on both the operator and machine
- Increased operator comfort and reduced fatigue
- Produces a smoother surface finish (equivalent to a 36 grit finish)
- Extremely versatile disc well suited when grinding carbon steel, tool steel, stainless steel, high tensile alloys, cast and non-ferrous metals
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

### AS30S (Minimum of 3Hp Motor)

Aluminum

Metal

Non-Ferrous

The AS 30S discs offer very quick cutting times and a long service life, even when used to cut a wide variety of materials. It offers very good stability when cutting making it a very cost effective disc.

Excellent disc when cutting metal profiles, pipes or solid materials.

- Quick cutting speed and a very good service life
- Externally reinforced for greater stability and safety
- Well suited for cutting carbon steels, tool steels, high alloy specialty steels, cast and non-ferrous metals.

# PORTABLE CUTTING DISCS

## A24R

Metal

Aluminum

Non-Ferrous

This disc offers quick cutting speed and a good service life at an economical price. The grit formula of this disc makes it well suited for cutting a wide range of materials such as steel, aluminum, copper, brass and bronze.

- Very quick cutting speed
- Good service life
- Externally reinforced for greater stability and safety
- Very good price/performance ratio
- Versatile disc well suited for cutting most metals found on construction sites

## AS30S SPECIAL

Metal

Aluminum

Non-Ferrous

This disc offers very quick cutting speeds and an excellent service life, making it an extremely cost effective disc for cutting metals.

- Very quick cutting speed
- Excellent service life
- Externally reinforced for greater stability and safety
- Excellent price/performance ratio
- Versatile disc well suited for cutting most metals found on construction sites

## C24R

Concrete/Masonry

This disc offers quick cutting speed and a good service life at an economical price. The grit formula of this disc makes it well suited for cutting most masonry/concrete materials commonly found on construction sites, such as concrete, sand-lime stone, slate and brick.

- Quick cutting speed
- Good service life
- Externally reinforced for greater stability and safety
- Very good price/performance ratio
- Economically price

## CS24R SPECIAL

Concrete/Masonry

This disc offers very quick cutting speeds and an excellent service life, making it an extremely cost effective disc when cutting masonry/concrete materials such as concrete, clinker brick, earthenware pipes, exposed aggregate concrete and brick.

This disc is also well suited when cutting ceramics, porcelain and marble.

- Very quick cutting speed
- Excellent service life
- Externally reinforced for greater stability and safety
- Excellent price/performance ratio
- Versatile disc well suited for cutting a wide range of concrete/masonry materials found on construction sites

## FLAP DISC BENEFITS

Superflex flap disc are a versatile grinding and finishing tool, they offer a long service life and stay sharp for 10-15 times longer than conventional fiber discs.

They provide cooler grinding and finishing in one-step, while generating very little noise.

Very little surface pressure is required making flap discs easy on both the operator and the equipment. They are easy to use and cost effective.

### G-AZ Gold

- the abrasive grain is less hard but very tough
- outstanding grinding capacity and service life

### G-AZA

- support of the abrasive Band contains cotton twill
- ideal for surface grinding
- very good grinding capacity
- outstanding service life
- no clogging up

### G-AK (Ceramic)

- self-sharpening
- robust polyester backing
- extremely high stock removal for the entire life of the disc
- cool grinding on surfaces and edges
- superior service life

### G- AZL

Same features as G-AZ

- longer lamellas make this the ideal disc for hard to reach areas

# FLAP PRODUCTS

## ZICONIATED G-AZL with Long Lamellas

Stainless

Metal

Aluminum

Non-Ferrous

The unique length of the lamellas (9mm longer than our standard flap discs) and the disc design makes this flap disc the ideal choice when working in hard to reach areas such as angles, corners notches, grooves, fillet welds and depressions.

The flexible rim of the flap disc adapts perfectly to these applications, while the strong polyester backing prevents early fray out.

- The abrasive grain is less hard but very tough
- Outstanding grinding capacity and service life
- Ideal for difficult to reach areas such as notches, grooves, fillet welds, corners and depressions
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

Dimensions (Diameter x Bore x Grit)	Vanguard Code 	Max. R.P.M. 80m/Second	Standard Packaging
5 x 7/8' G-AZ40	7341 0405L	12,200	10
5 x 7/8' G-AZ60	7341 0605L	12,200	10

Additional grits available upon request, minimum order quantity may apply

# FLAP PRODUCTS

## ZIRCONIATED G-AZ GOLD

- Stainless
- Metal
- Aluminum
- Non-Ferrous

The abrasive grain is less hard but very tough, giving this disc very good all purpose characteristics. It is an excellent choice when deburring, machining welding seams and breaking edges.

The fibre glass backing is characterized by an even grinding finish up to the complete consumption of the abrasive grain. As a result, no scratches will appear on the work piece.

- Ideal for working on edges of both mild steel and stainless steel
- Outstanding grinding capacity and service life
- Excellent service life
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

Dimensions (Diameter x Bore x Grit)	Vanguard Code		Max. R.P.M. 80m/Second	Standard Packaging

## FLAP PRODUCTS

### ZIRCONIATED G-AZA GOLD (with Trimmable Plastic Backing)

The AZA Gold flap discs contains premium quality zirconium corundum abrasive lamellas.

The trimmable plastic backing allows the operator to “shave” off the backing exposing the remaining flaps, maximizing the discs service life.

The plastic backing also offers excellent strength and durability.

- Support of the abrasive band contains cotton twill
- Ideal for surface grinding
- Very good grinding capacity
- Outstanding service life
- No clogging up
- Free of iron, sulphur and chlorine (Fe, S and Cl≤0.1%)

- Stainless
- Metal

## CERAMIC G-AK GOLD

- Stainless
- Metal
- Aluminum
- Non-Ferrous

The G-AK flap disc uses innovative ceramic lamellas, that are self sharpening which guarantees extremely high stock removal throughout the full life of the disc.

This disc offer outstanding results when grinding on surfaces as well as edge grinding on carbon steel and stainless steel. Due to the extremely high load capacity this disc is ideally suited for extreme grinding applications.

- Service life of up to 3 times most premium zirconiated flap discs
- Extremely high stock removal capacity
- Outstanding service life
- Self sharpening
- Cool grinding on surfaces and edges
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

Dimensions (Diameter x Bore x Grit)	Vanguard Code 	Max. R.P.M. 80m/Second	Standard Packaging

## GPS DUAL FLAP DISCS

Stainless

Metal

Aluminum

Non-Ferrous

This GPS dual flap discs consist of a 5" outer flap disc and a 3-1/2" inner flap disc both having different grits or materials.

Both discs are mounted on a standard angle grinder. To change between the inner and outer discs you simply adjust the grinding angle, 30° when the operator needs to use the outer disc and 15° when the inner disc is required.

- Increased productivity as two tasks can be performed with one disc
- Designed to work on a standard angle grinder
- Combinations can be customized to meet each applications unique requirements
- Plastic backing offers excellent strength and durability
- Suitable for carbon steel, tool steel, stainless steel, welding seams, high tensile alloys, cast, aluminum and non-ferrous metals
- Free of iron, sulphur and chlorine (Fe, S and Cl ≤ 0.1%)

## NON-WOVEN POLISHING DISCS

- Stainless
- Metal
- Aluminum
- Non-Ferrous

Polishing flap discs consisting of an innovative, highly effective non-woven grinding fleece in a fan shaped flap structures which provide outstanding results when working with stainless steel, aluminum, aluminum alloys and non-ferrous metals.

### Excellent for:

- The removal of rust, paint, thermal bluing
- Surface preparation and finishing of welding seams
- Deburring and Polishing
- Cleaning and/or polishing of unalloyed steel, high alloy steel, stainless steel, aluminum and non-ferrous metals
- Grinding edges and surfaces

## FLAP PRODUCTS

### ZIRCONIATED MINI FLAP DISCS

Stainless

Metal

Aluminum

Non-Ferrous

Flap disc technology with the convenience and versatility of quick change discs. They come standard with Type R (male plastic thread) for quick and easy mounting.

Their "mini" size makes them ideal when working in tight areas. The flap disc design offers extremely quick stock removal, outstanding service life and cool grinding.

Only premium quality zirconium lamellas are used making this product well suited on a wide range of materials.

- Ideal for working in tight areas
- Grinding and finishing with one product
- Quick change backing
- Suitable for carbon steel, tool steel, stainless steel, welding seams, high tensile alloys, cast, aluminum and non ferrous metals.
- Free of iron, sulphur and chlorine (Fe, S and Cl  $\leq$  0.1%)

# FLAP PRODUCTS

## FLAP WHEELS *Shaft Mounted*

Metal

Superflex shaft mounted flap wheels are manufactured with premium aluminum oxide grain on an x-weight cotton backing. This gives Superflex flap wheels superior durability and greater flexibility, improving the finish and performance.

They are designed for blending and finishing applications. The shaft mount makes this product ideal when working in hard to reach areas where a larger abrasive will not fit.

## SHAFT MOUNTED MINI ABRASIVE FLAP WHEELS

We offer some of the smallest high quality mini flap wheels in the world. They are the ideal product for detailed finishing, hard to reach applications, tooling and die maintenance.

Mounted on a 1/8" shaft we can supply flap wheels ranging from 3/8 - 1-3/16" in diameter, and widths of 3/16 - 5/8". With a grit range of 60 to 320.

## UNMOUNTED ABRASIVE FLAP WHEELS

Manufactured with premium aluminum oxide grain on an x-weight cotton backing Superflex unmounted flap wheels offer outstanding flexibility and service life.

We can supply an extremely wide range of sizes (up to 16" diameter and 8" face width) and grit range (40 to 400grit). We also use up to 30% more flaps to guarantee unmatched stock removal and service life.

## INTERLEAF FINISHING FLAP WHEELS

Mounted on a 1/4" shaft, interleaf flap wheels contain alternating abrasive cloth and non woven finishing materials. Ideal for applications that require stock removal while leaving a brush finish. Also an excellent product for deburring and finishing in one step.

Available in medium with 80 or 120 grit, in fine with 150 or 180 grit and very fine with 240 grit.

## FLAP ROLLS

Flap rolls have a wide profile (up to 4") making them the ideal product for finishing large surface areas. Their rotation provides a grained, or linear surface finish, as opposed to the swirl pattern that is produced when using disc products.

This product can be supplied with abrasive rolls, flap rolls, interleaf or non woven. They are available with a key slot or a 5/8-11 threaded bore.

# FIBRE/SANDING DISCS

## ALUMINUM OXIDE

Metal

Superflex aluminum oxide fibre/sanding discs are an excellent tool for the removal of rust, burr and coatings.

They are ideally suited for all grinding operations.

- Very high stock removal capacity
- Excellent service life
- No harmful additives, user friendly

## PREMIUM ZIRCONIUM

- Stainless
- Metal
- Aluminum
- Non-Ferrous

Superflex zirconiated fibre discs have an extremely hard abrasive alloy that sharpens itself during use. Our unique formula delivers an outstanding cutting rates and an excellent service life on a wide range of materials.

The advanced bond extends the discs service life by minimizing grain shedding, while promoting a cool grinding action which reduces both glazing and loading.

- Very high stock removal capacity
- Excellent service life
- Advanced bonding formulation provides cool grinding

## SMD (Soft Metal Discs)

Are designed for use on softer metals such as aluminum, brass and bronze. These discs disperse their own lubrication as they grind, this delays heat build up on the metal work piece which increases the discs service life.

- Reduces disc waste and costly changeover times
- Low pressure is required for optimum performance

## PMD (Premium Metal Discs)

Were developed specifically for use on stainless steel and other alloys. They provide a higher cut rate and cooler grinding temperatures. The exclusive formula of this disc uses heat treated blue fired ceramically coated aluminum oxide, ceramic grain and a custom blended grinding aid.

- Contains a synthetic wax
- Anti glazing, anti loading cool grinding product
- Engineered specifically for hard metals such as 300 series stainless steel, carbon steel, exotic alloys and titanium

## CER (Ceramic)

Fibre discs are coated with SG ceramic grain, a proven winner on applications where heat is a problem. The grains remain sharp as they fracture as new cutting edges are continually exposed while grinding extending the discs service life and stock removal capacity.

- Maintain their sharpness longer, which minimizes metallurgical damage during metal removal
- Cut heat sensitive metals very quickly with a noticeable reduction in the work piece discoloration
- Offers unmatched service life on carbon steel

## SILICON

Discs are designed for use on stone products such as terrazzo, ceramic and non-ferrous metal stock removal.

- Extremely quick cutting action on non-ferrous metals
- Clean bonding promotes a safer, healthier work environment

## ALUMINUM OXIDE QUICK CHANGE MINI DISCS

Superflex mini fibre discs are manufactured using multi layer heavy duty vulcanized fibre backing. Coated with specially processed grit that has been engineered for toughness, sharpness and bond.

Superflex mini fibre discs are powerful, versatile, flexible, safe and extremely economical. They are available with either a Type N (metal female style thread) or a Type R (male plastic thread).

- Ideal for grinding, blending and deburring on a wide range of materials
- The tough fibre backing resists tearing

Available in a wide range of materials, (Zirconiated, SMD and PMD)

## FIBRE/SANDING DISCS

### SUPER PREMIUM QUICK CHANGE MINI DISCS

The Mini GrindR disc uses a Type R (plastic male plastic thread) design as it's base. The abrasive grain is fused directly onto the tough polymer backing. Not paper, not cloth, or even fibre, but plastic.

This one piece design prevents the risk of detaching. The polymer also promotes cool efficient grinding.

Available in 1-1/2 to 4" diameters with aluminum oxide, zirconia, SMD and PMD materials.

**TRIM-KUT®**

This is a revolutionary abrasive disc designed to grind and finish a wide variety of materials faster and cooler than any other abrasive disc available in the market.

The patented process of fusing premium abrasive grains to a durable polymer backing results in a highly versatile grinding tool that requires no backing pad. The polymer backing is trimmable allowing the operator to either renew the cutting surface or reduce the discs diameter.

- Ideal for grinding or sanding applications
- Available with a wide range of materials, aluminum oxide, silicon carbide, SMD and non-woven materials.

## GENERAL INFORMATION

Non-Woven abrasive products are manufactured from synthetic fibers, bonded together with specially formulated resins and impregnated through the web with mineral grain creating an open, three dimensional structure.

These products are designed for a broad range of applications including light duty cleaning, polishing, scuffing, finishing and for heavier jobs such as paint, rust and corrosion removal.

The tough synthetic fibers will not rust, they can be used for dry scuffing and/or finishing. They can also be used with water and chemical solvents.

They are highly flexible making them well suited for hard to reach areas and they are strong enough for continuous use. Non-woven products are available in a variety of grades ranging from hand cleaning to high-speed machine use.

### SCUFF DISCS
