

HOTStars

 Male / Male connector required

How many GFCIs do I need?

To power on and off a mat you require a GFCI unit which connects your mat to either a 120V or a 240V electrical outlet. You can connect up to 15 Amps on a single GFCI. If your connected Mats exceed 15 Amps you will have to split up the mats and add a second GFCI to plug in a separate outlet.

Product type	120V	240V
HOTStars Stairs Tread	0.8 Amps	0.4 Amps
HOTStars Door / Landing	2.1 Amps	1.1 Amps
HOTStars Passage Way	2.1 Amps	1.1 Amps
HOTStars Walkway	3.9 Amps	2.0 Amps
HOTStars Driveway	5.3 Amps	2.9 Amps

How do the mats connect?

Each mat has a male and female connector. Connect the male connector on one mat to the female connector on another mat, align the groves, push in and screw.

For more layout choices, 20", 40" and Custom extensions available.

Mats can be daisy chained.

Extension : Male-Female, Female-Female, Male-Male

F Female Connector

M Male Connector
