

# ZENITH

USER MANUAL

[www.sunslice-solar.com](http://www.sunslice-solar.com)

## I. INTRODUCTION

Thank you for your purchase. We hope you will have a great experience using the Sunslice Zenith.

The Zenith has been developed by Sunslice, a Belgian company created by 2 young engineers, with the ultimate goal to give people access to energy everywhere. This solar backpack, with an ideal solar charging speed for travellers is extremely practical and can be carried with you everywhere to make you enjoy the sun twice.

This manual contains important safety and product care information, as well as step-by-step instructions for using your Zenith. To get the greatest benefit from your purchase, we recommend you read the manual thoroughly, and keep it in a safe place in case you need to refer to it later.

Geoffroy & Henri

### IN THE BOX

Zenith

User Manual

Gravity powerbank (optional)

### COMPATIBLE WITH

## II. PRODUCT OVERVIEW

8 Watts high efficiency solar panel

Resistant straps

High quality zippers

Elastic external compartment

Waterproof and shockproof bottom

Front pocket

Integrated solar bag cable

To be connected to

USB - OUTPUT of solar bag

USB-Cable

USB - OUTPUT Solar panel

To be connected to

USB - INPUT External battery

USB - OUTPUT External battery

### III. QUICK START

To charge a device, it is strongly advised to **connect an external battery to the solar panel** and then connect your device to this external battery. This smoothens the output power generated by the sun.

To connect the battery to the solar panel, connect a USB-cable to the **solar USB-output** at one end and to the **USB-input of an external battery** at the other end. The battery starts charging automatically when the sun shines on the panel.

To charge your device you can use a classic USB-cable (or the optional Trident-cable) from the external battery to your device. Another practical way is to connect the **integrated solar bag cable** (cfr. drawing) to the external battery and followingly connect a USB-cable to the **USB-output of the solar bag** and to the device to be charged.

The 8 Watts solar panel charges a Phone in about 3 hours in the sun. Depending on the Phone, the intensity of the sun and the exposure of the bag, these performances can vary.

### IV. KEY FEATURES

### V. INCREASE THE SUNSLICE EXPERIENCE

*Here are some recommendations for an optimal experience.*

- Incline the Zenith in the right direction to receive as much sunlight as possible. It is best to place the panels perpendicular to the Sun in order to maximise performances.
- Try to expose the solar panel uniformly in the sun. Placing the panel behind a window reduces the solar performance.
- Different phone models and devices (e.g. for smartphones : One Plus, Iphone, Huawei, etc) react differently to charging depending on their own electronic characteristics. Charging time and performance can thus vary accordingly.

### VI. OUR WARRANTIES

#### PREMIUM QUALITY

We select the finest materials to insure a high quality and durability for all of our products.

#### PROTECTION CIRCUIT

The Zenith is equipped with a voltage stabilising circuit to avoid damaging your devices.

#### HIGH EFFICIENCY SOLAR CELLS

The Zenith is equipped with highly efficient, and flexible solar panels. They are among the best flexible panels available on the market, supplying more energy from a smaller surface area than cheaper solar panels.

#### 2 YEARS WARRANTY

The Sunslice Zenith has a 2 year warranty. In case something goes wrong, please contact us directly by email at : [service@sunslice-solar.com](mailto:service@sunslice-solar.com)

PLEASE CONTACT US DIRECTLY

### VII. PRECAUTIONS

- Do not puncture, throw, drop, bend or modify your Sunslice Zenith. Do not crack the solar panels.
- Do not leave the Sunslice Zenith out in the rain, keep away from water. Do not expose the (optional) external battery of the Zenith to fire or excessive heat.
- Do not short-circuit the optional battery with lead or any metal objects.
- Do not use excessive force when plugging or removing cables. Do not twist the charging cable excessively.
- Do not clean the Zenith in a washing machine but by hand. To clean the solar panel, use a non-abrasive cloth.
- Do not disassemble the charger or change its structure in any way.
- Stop using the Sunslice Zenith if it generates unusual smell, heating, distortion or any other abnormality.
- Keep away from children.

*You are mostly welcome on our website to learn more about our products !*
