

# Installation Instructions

Attach the paddle to the side of the equipment. *We provide a zip tie for attachment, but you can attach the paddle however you see fit.*

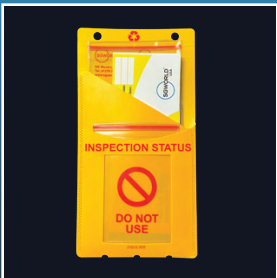

Insert Inspection Book into the larger, weather proof wallet. *The Inspection book stays with the equipment at all times.*

Insert small inspection wallet into the paddle. *This will house the visible PASS or FAIL indicator.*

## How It Works

Visible DO NOT USE indicator prompts operator to perform safety check

Checklist guides operator through the inspection, capturing name and date.

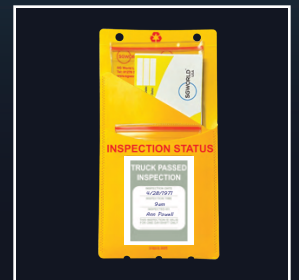

The top copy is ripped out, and a carbon copy is retained in the book.

PASS or FAIL slip on the reverse of the inspection is filled out

PASS or FAIL slip is placed inside of the small inspection wallet.

Inspection Status is displayed on equipment at all times.
