

# CT-Minerals

WHOLE BODY SUPPORT\*

## KEY BENEFITS

- Supports cellular energy\*
- Assists cognitive function and mental clarity\*
- Aids natural detox processes and the gut microbiome\*

## PRODUCT DESCRIPTION

CT-Minerals are a convenient way to support the body's daily micronutrient needs for optimal cognitive function, energy production, immune function, nervous system support – and to enhance well-being.\* Each capsule provides two forms of highly bioavailable magnesium and a variety of trace minerals derived from fulvic acid (sourced from the soil and decomposed plant life) which are typically easier for the body to utilize.\*

In addition to their trace mineral content, fulvic acids nourish the gut microbiome, support gut function,

and may assist nutrient absorption from other foods and supplements.\* This reinforces digestive health and the body's natural ability to detoxify.\*

CT-Minerals is helpful for any person where minerals are lacking in diet alone. Previously available in a liquid format, the powdered mineral capsules are more potent than the liquid drops with the addition of magnesium malate and magnesium acetyl taurate. Magnesium is one of the most needed minerals in the body and is depleted by stress.

## LABEL INFORMATION

**Directions:** Take 1 capsule, once daily or as otherwise directed by a healthcare practitioner.

**Handeling Instructions:** Store in a cool, dry place.

**WARNING:** Please consult your healthcare practitioner before use if you are pregnant, breastfeeding, or considering use for a child.

**KEEP OUT OF REACH OF CHILDREN.**
