Lezyne LED Ally
to pair lights & customize modes

READ ENTIRE MANUAL BEFORE OPERATION to ensure proper use and care of your new Lezyne LED light. Traffic laws mandating lighting vary from country to country. Inform yourself about lighting laws and regulations in the country of use. Lezyne LED lights do not conform to the German road traffic regulation StVZO.

SUPER DRIVE 1800+
Warnings

DO NOT LOOK DIRECTLY INTO LIGHT BEAM or shine into eyes of another.

Lezyne LED Lights have a water resistance rating of IPX7 under IEC standard 60529. Submerging the device is not recommended. If moisture does enter the casing, air out until completely dry.

DO NOT ATTEMPT TO REMOVE ELECTRONICS. Doing so will void warranty.

Lezyne USA, Inc. does not accept any liability for injuries or other damages resulting from the use of this product in any circumstances.

Warranty

In U.S. and U.K., Lezyne LED Lights carry a two (2) year warranty from the original purchase date to the original owner (proof of purchase required). Lezyne Batteries carry a six (6) month warranty from the original purchase date. Lezyne warranties cover any manufacturing defects in materials or workmanship. Issues not covered by warranty include normal wear & tear, improper installation, attempting to access or modify electronics, damage or failure due to accident, misuse, abuse and/or neglect.

For all warranty issues worldwide, please contact the retailer that sold the product.

For any warranty questions contact: warranty@lezyne.com

Mounting
Operation

1. On/Off: hold button two (2) seconds.
2. Mode cycle: click button

RACE MODE: With the light OFF, hold button for five (5) seconds, until light flashes.
The light is now in Race Mode where only Overdrive and Enduro outputs are selectable. The light will remain in Overdrive Race Mode even when switched OFF. Repeat the step above to return to the normal mode set.

MODE MEMORY: The light remains in the output setting it is switched OFF in.

THERMAL PROTECTION: If the operating temperature of the light is too high, the light automatically lowers the lumen output.

Run Times and Modes

All light modes are available when using the Infinite Light Power Pack+ and XL+. However, when the light's internal battery is low, certain light modes will be limited for battery safety reasons.

Power Pack+ Low battery USB mode	⚡	⚡			⚡	⚡	⚡

⚡ RACE MODE

OVERDRIVE MODE: A great use for this is when alternating between steep climbs and descents. While climbing, you'll be traveling at a much slower speed, so it's a great time to conserve battery with the lower setting. When you reach the top and start to descend at a higher speed, you can hit the button once, and switch to the highest output of the light without having to search through all the flashing modes.

DAY FLASH MODE: Specifically flashing is the single most effective way to make yourself more visible.

Charging

Before using your Lezyne LED Light for the first time, fully charge the battery.
To charge your light:

1. Switch light OFF
2. Remove USB-C protective cover
3. Connect USB-C cable and light to powered USB-C port
4. Once charging, button will flash green; if USB-C port is capable, light will use High Efficiency (HE) charging and button will flash blue

If button does not flash when plugged in, selected USB-C port may not be powered—try another USB-C port.

Light will be charged after 6–8 hours (4–6 with HE charging) or when button illuminates solid green or blue.

5. Remove light from charger and reinstall USB-C protective cover—ensure USB-C protective cover is fully installed for water resistance
