

LEZYNE

Y18 LED LIGHTS BEAM PATTERN GUIDE

LEZYNE LED LIGHTS

Our lights continue to lead the industry in quality, design, and safety. All of our lights are designed and produced in-house to meet our strict performance standards and feature advanced programming, the best materials, optimized lenses, and class-leading emitters. They are then verified in our own integrating sphere and each light is quality controlled before leaving our factory. Furthermore, with daytime visibility becoming more important than ever, we offer a full range of head and taillight options to keep you visible at all hours of the day. We've continued to develop "Smart Connect" for our LED platform, giving users even more control and ease of use throughout our line of premium bike lights.

FEATURES LEGEND

ALERT
The Alert feature detects deceleration on the bike.

INFINITE LIGHT
Infinite Light Power Pack+ Compatible.

SMART CONNECT
Control compatible Smart Connect LED lights with our app or GPS.

TRI-FOCUS OPTICS
Engineered three-LED system with optimized lens.

WIDE ANGLE OPTICS
New lens technology provides up to 270° of visibility.

USB-C
Waterproof USB-C fast charge compatible.

DAYTIME FLASH
Disruptive flash patterns for the best daytime visibility.

IPX7 Waterproof rating.

LED ALLY APP

Smart Connect is an innovative technology we developed in-house to control, simplify, and customize compatible Lezyne LED lights. Using the app, Smart Connect lights can be controlled directly and/or programmed (as a combo or individually). Paired combos allow the front light to wirelessly control the rear light.

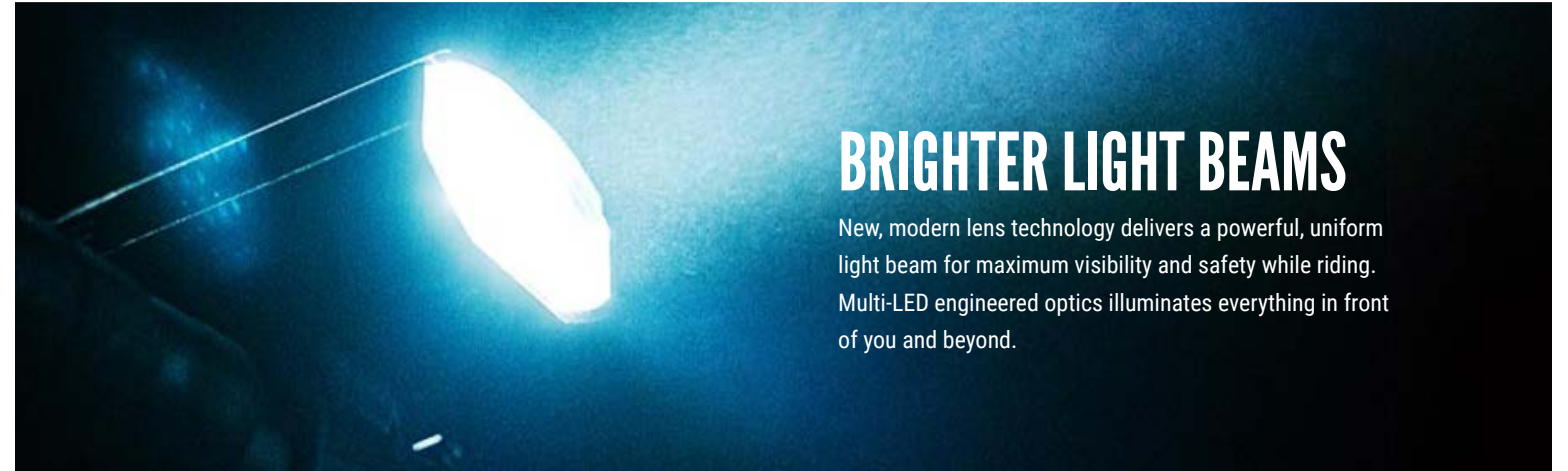

WATERPROOF USB-C

The waterproof USB-C charging port provides protection in any weather condition and maintaining your light's powerful performance. Fast charging (3.0 and 2.0) is also supported.

BRIGHTER LIGHT BEAMS

New, modern lens technology delivers a powerful, uniform light beam for maximum visibility and safety while riding. Multi-LED engineered optics illuminates everything in front of you and beyond.

LONGER RUNTIMES

Impressive higher battery amp-hour capacities provide longer run times for unbeatable performance, even on the longest rides.

IMPROVED HEAT DISSIPATION

Advanced heat sink technology offers high efficiency and prevents overheating, along with an aluminum body with integrated cooling fins for maximum durability and longevity.

STRIP DRIVE 56g

- Max 400 lumens / 21.5-hour runtime in Flash mode.
- Lightweight, durable, and waterproof co-molded design.
- Five ultra high-output LEDs with built-in side visibility.
- Ten combined solid and flash output modes.
- Highly disruptive Daytime Flash mode.
- Integrated USB-stick for cable-free recharging.
- Multiple mounting options, including aero bars and front racks.
- Rigorously tested to IPX7 Waterproofing standards.
- 520 mAh battery capacity.
