LED ALLY APP + SMART CONNECT - QUICK START GUIDE

Follow these instructions to wirelessly pair, control and customize compatible Lezyne Smart Connect LED lights.

Download the LED Ally app: [GET IT ON Google Play] [Download on the App Store] **Click to view video tutorial >**

STEP 1
**Before you open the App:**
Turn on your Smart Connect light(s) if pairing for the first time.

STEP 2
Open app & scan for devices:
App will scan for available Smart Connect lights. If you've already paired, your lights will show up automatically.
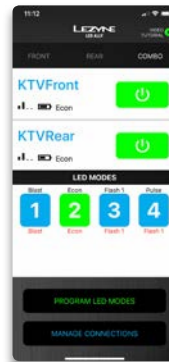

STEP 3
Select and connect LEDs:
Select the lights you want to pair with and tap "Connect LED(s)."
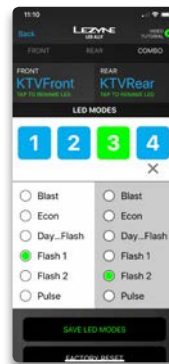

STEP 4
Rename LEDs:
If pairing for the first time, give the connected LEDs a unique name.

STEP 5
**Control your LEDs:**
Use this interface as a dashboard to wirelessly control connected Smart Connect LED lights. Tap "Program LED Modes" to customize.

STEP 6
Custom program:
Program up to 4 modes for individual lights, or 4 mode-sets for linked front and rear combos. Tap "Save LED Modes" to confirm and return to the control page. Continue using the app to control your lights, or close the app and the lights' custom modes will operate as programmed, with or without the app.

STEP 7
Linked F/R Combos:
If you linked a front and rear light together in the app, the rear light will now automatically turn on with the front light. The front light will also wirelessly control the rear light as you toggle through its modes.
