[OVERVIEW]

Today Craig and Creek dive into the VITAL importance of having a disaster-proof, long-term fresh drinking water plan and 3 simple steps to do so.

Today We'll Get Into:

- how to source, store and filter water when your primary source runs out or otherwise becomes undrinkable.
- We will talk about how to build a multi-year water buffer AND how to identify and implement a renewable source of backup drinking water.
- And before we're all done we'll discuss various water sources, manual pumps, a simple rain capture system and water filtration and purification so you can be confident that you and your family have access to safe drinking water.
- And a lot more...
