

MDX

PINNING SYSTEM

LOCKING SYSTEM FOR
MEGADECK® HD+

The MDX Pinning System is designed for strength and ease of use.

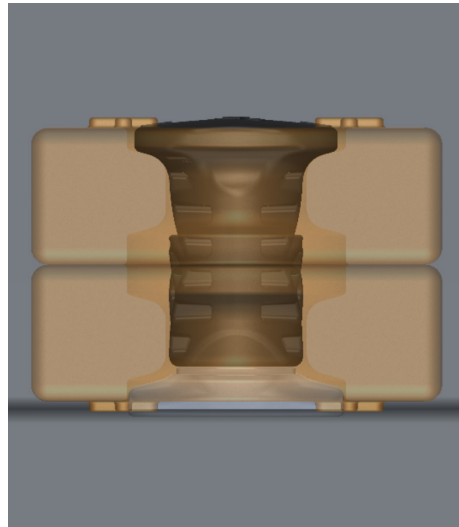

Signature Systems' advanced MDX pin features a high strength, aluminum alloy pin core encased in a strong, highly engineered plastic case that facilitates faster and easier installation while handling the most extreme loads and impacts.

Work Anywhere with MegaDeck® HD+ Composite Construction Mats and MDX Pinning System

Faster and Easier Installations

Large pin hole is machined directly into mats, eliminating the need for a cam system.

Secure Connection System

Large pin foot locks mats together with indicators to show locked or unlocked position.

Stackable Mat Design

New system is designed to be reversible, allowing mats to pin together to create elevated sections and layered roads.

Safe in Wet & Muddy Conditions

The new design provides greater surface area for locking mats together, helping to ensure a stable platform over the most challenging terrain.

Lighter Weight Heavy-duty Mat

MegaDeck HD+ heavy-duty mats' utilize an improved strength to weight ratio honeycomb internal structure that supports loads up to 600 psi.

Easier to Clean

The large pin holes and no metal cams make these composite mats even easier to clean and maintain.
