

Heavy-Duty Turf Protection System

OmniDeck® HD is a heavy-duty, omnidirectional installing, drivable turf protection system for equipment and vehicles.

Innovative “puzzle” pieces interlock in omnidirectional configurations and can be deployed around fixed objects like posts, walls, electrical outlets and fit in nonstandard spaces. The panel system can be deployed in north, south, east and west directions simultaneously. Built-in locks secure panels with no loose pieces.

Safe for Natural, Synthetic or Hybrid Turf

- Closed bottom design distributes weight evenly, preventing damage to turf
- Aeration holes allow in light, air and moisture and allow drainage to maintain the health of turf or grass surfaces
- Translucent material allows sunlight to reach turf

Advantages

- Each panel is lightweight and easy for one person to carry and install
- Protects synthetic, natural and hybrid turf
- Panels connect with ADA compliant ramps for access on any side
- Built-in locks secure panels for safety and protection

Features and Benefits

- Innovative puzzle-piece design for fast omnidirectional installation
- Installs in north, south, east and west directions simultaneously
- Build around fixed objects or electrical outlets
- Easy to access subsurface by removing one or more installed panels
- Built-in safety features
- Easy to transport and store
- Built-in UV stabilizers to reduce sun damage
- Anti-static additives reduce static buildup
- No thin walls or overhangs to eliminate cracking or corner breakage

Heavy-Duty Applications

- ✓ Temporary stadium flooring
- ✓ Portable outdoor event flooring
- ✓ Ground protection
- ✓ Tent flooring
- ✓ Accessways for vehicles
- ✓ Staging areas for equipment

SPECIFICATIONS

SIZE

Actual

6 ft L x 3 ft W x 1.5 in H
(1.8 m x 0.9 m x 3.8 cm)

Usable Surface Area

18 ft²
(1.67 m²)

WEIGHT

58.5 lbs (26.5 kg)

WEIGHT CAPACITY

600 psi, depending on
subsurface conditions
