

## Hexagonal Modular Tiling for Temporary Roadways and Flooring

HexaDeck's® interlocking tiles provide a perfect, tool-free solution for portable flooring and vehicle roadways. The unique design of HexaDeck® provides extraordinary support for heavy static and dynamic loads, making it perfect for roadways, vehicle maintenance tents, aircraft storage aprons, and heavy-duty shelter flooring.

By design, HexaDeck® tiles provide a clean and level surface on multiple terrain types. Create a stable surface over sand, gravel, mud, grass, asphalt and even tundra. Each tile is light enough to be carried by a single person while the interlocking nature of the tiles prevents the foreign debris from the surface below from interfering with equipment, vehicle maintenance, or emergency relief efforts above.

Use HexaDeck® to create temporary roadways over virtually any type of terrain. It's unique ribbed structure on the underside of each tile distributes weight effectively on uneven ground, ensuring a solid roadway for trucks, forklifts, and other heavy vehicles.

Ribbed underside provides unparalleled strength and weight support

Protects vehicles and equipment from foreign object damage

### Practical & Low-Maintenance

HexaDeck® is made of high-density polyethylene (HDPE), making it extremely durable and capable of withstanding most weather conditions. It is waterproof and will not rust, warp or splinter. The tiles can be easily cleaned with water and any standard industrial detergent.

When not in use, HexaDeck® stores compactly on pallets for easy transport and redeployment. And since it does not use bolts, screws, or any mechanical fixtures – there are no clips or parts to lose, break or damage.

### Benefits and Features

- Deploys over virtually any terrain
- Unique ribbed structure on underside distributes weight effectively
- Made of rugged HDPE – manufactured with Signature’s proprietary anti-static blend
- Extremely durable and able to withstand most weather conditions
- Waterproof; will not warp or splinter
- Creates roadways of nearly any size and shape; including turns and angles
- Lightweight, single-person carry tiles

Hexagonal shape allows for a base flooring in a variety of shapes and sizes

Quickly deploy temporary roadways

### SPECIFICATIONS

#### Module Size

26 in (66 cm) at widest point.  
3 ft<sup>2</sup> (0.3 m<sup>2</sup>) area

#### Material

High-impact polypropylene (HDPE)

#### Weight

6 lbs (2.7 kg)

#### Weight Load

30,000 lbs/ft<sup>2</sup> (146,472 kg/m<sup>2</sup>)
