

DURADECK®

DURADECK MATS FOR VEHICLE TRACTION AND GROUND PROTECTION

USAGE AND CARE

GROUND SURFACE:

DuraDeck mats are designed to be used with no ground preparation over grass, gravel, soil, concrete, asphalt, mud and sandy-soil conditions.

WEIGHT LOADING:

Varies, depending on sub-surface, up to 80 ton capacity on solid, flat subsurface.

DuraDeck mats have built in engineered flex. They are manufactured with this characteristic to allow for gradual contouring over uneven terrain and to provide additional tensile strength. DuraDeck mats are designed to return to their original flat form and will naturally return to a flat surface. This flattening process can be accelerated by putting mats inside a heated area.

PLEASE USE CAUTION WHEN ENCOUNTERING THE FOLLOWING SITUATIONS:

Avoiding puncturing the mats:

- Do not drop large, heavy objects onto the DuraDeck mat.
- Do not drop objects with sharp extensions from extended heights, such as tree limbs.
- Do not place outriggers on the mats without the use of a properly-sized outrigger pad (especially outriggers with sharp grousers).
- Remove large rocks or protruding objects from ground surface below, especially when moving heavy equipment across the mats.
- Avoid subterranean pipes or similar objects when laying mats down – especially when moving heavy equipment across the mats. This is a precautionary step to prevent avoidable problems.

Bridging:

DuraDeck mats are not recommended for bridging gaps, such as ditches or an open area in the ground surface.

Extreme Terrain:

Use caution on extremely rough or uneven terrain when using heavy equipment on the mats. Slow and even equipment torque should be applied in these extreme situations.

Track Equipment:

While DuraDeck can withstand the movement of track machinery, there is a possibility of scratching or nicks. These nicks should not affect the durability of the DuraDeck mats or its performance.

IMPORTANT NOTE:

The above descriptions and cautions are intended only as guidelines and proper judgment should be exercised in all situations. DuraDeck mats are extremely durable and designed to withstand extreme weight loads and ground conditions.

7-YEAR WARRANTY:

DuraDeck Mats have a 7-year limited warranty – reinforcing our commitment to DuraDeck mat users and reinforcing that DuraDeck is designed for years of life, even under harsh ground conditions.
