

# Turf Reinforcement (TR) & Grass Protection (GP) National Case Studies

## BEAGLE RESCUE HOME, OHIO

Beagle rescue home uses Tenax TR to protect the backyard from dogs they take in and provide temporary refuge.

## KENTUCKY HORSE FARM, LEXINGTON, KENTUCKY

Horse farm uses Tenax TR to prevent horses from rubbing the bark off trees in the pastures. Instead of building small wooden fences around the trees, they wrap all trees with Tenax TR.

## FIVE RIVERS METRO PARKS, DAYTON, OHIO

The Dayton Parks system uses Tenax GP for green space parking for vehicles and horse trailers, as well as for horse trails.

## COLUMBUS PARKS SYSTEM, COLUMBUS, OHIO

Tenax TR and GP is the product designated to be used along heavy foot traffic areas of a popular Frisbee Golf Course, and park trails to bring back the grass and get rid of the muddy trails and tees.

## ACTION LANDSCAPE, LOUISVILLE, KENTUCKY

Since trees grow twice as fast above ground, Action Landscape has decided to move away from the typical wire frame and use Tenax TR. Using the TR they make baskets large enough to wrap the tree root systems and allow the roots room to breath and grow in a cost effective method.

## COAST OF NORTH CAROLINA TOURIST TOWN

This small coastal town has installed Tenax GP in the main part of town as green space parking.

## AMERICA'S FARMLANDS

Tenax TR & GP are used for stacking hay & straw. It provides air circulation, and will not allow space for mice & rats. Tenax TR & GP is also used as pathways from the house to the barn; and as the entrance to the barns where the most wear takes place from the equipment and animals.

## AMERICA'S HORTICULTURAL INDUSTRY

Tenax GP & TR can be cut to size for the benches used to grow plants in pots at hot houses. Tenax GP/TR is less expensive than the stainless steel grids currently used in the industry. It is also resistant to the fertilizers and pesticides used in the growing process.

## AMERICA'S CONSTRUCTION SITES

Tenax GP is used as a portable bridge from the street to the customer's backyard. Carrying it on the truck or trailer as their way to get equipment to the work site without damaging the yard in the process. Landscapers also use Tenax GP as a wheel barrel run.
