Fort Scott Munitions™ (FSM®) 338 Lapua Magnum (TUI™) 250 grain solid brass rifle ammo is a match grade rifle ammunition made of solid brass and designed to Tumble Upon Impact™ (TUI™) to provide devastating power. This round is extremely accurate at long range and has a ballistic coefficient of .850. It also has a very high velocity traveling 2994 feet per second. While designed as precision ammo for rifle hunters, this round is perfect for long range competition shooting.

Unrivaled Hunting Performance

If you are a hunter, you know how important it is to have pinpoint accuracy. The 338 Lapua Magnum (TUI™) 250 grain rifle ammo is manufactured to ensure accurate performance at long distances.

The design to Tumble Upon Impact™ (TUI™) reassures that there will be a quick, humane kill with every well-aimed shot. This round is perfect for hunting as well as competition shooting as it delivers unbeatable precision with every shot.

Eco-Friendly Ammo

This brass ammo is made with limited amounts of lead in the projectiles making them great for the environment while also providing an ethical kill. You can target game ranging from coyotes, hogs, deer, and up to bear, elk and other large predators with total confidence. The ballistic properties of this round ensure that you are able to get the most from every shot fired.

See Ballistic Brilliance in Action

See the superior ballistics of this Tumble Upon Impact™ (TUI™) ammo design for yourself. With a ballistic coefficient of .850, this round performs at an exceptional level. Thanks to the tireless efforts made by our R&D team, we are able to bring you ammunition that surpasses traditional designs. As a result, you can be sure that 338 Lapua Magnum (TUI™) ammo won't fail you when performance matters most.
