Fort Scott Munitions' (FSM®) 357SIG (TUI™) ammo is a match grade handgun round, with a Tumble Upon Impact™ (TUI™) action that exceeds the performance of a standard expanding projectile for decisive terminal impact. Engineered to create a dynamic, Tumble Upon Impact™ (TUI™) wound cavity, the unique multi-patented design of our 357SIG pistol ammunition provides superior performance. If you carry a small caliber handgun, you know your life may depend on accurate shot placement.

Unfailing Accuracy

This fast, powerful round gives you superior accuracy and a tactical advantage in any situation. Fort Scott Munitions™ (FSM®) ammo provides impressive ballistic performance and ensures accuracy in a critical situation. When you need small caliber home defense ammunition that you can trust your life with, 357SIG (TUI™) ammo is a sure-fire solution. Fort Scott Munitions™ has raised the bar for 357SIG (TUI™) performance with this match grade self-defense ammo.

Potent and Powerful

Our 357SIG shells are the ideal choice when you need large caliber effectiveness from an easily concealable handgun. This precision ammo is perfect when you need to act fast and group your shots to target vital organs. The Tumble Upon Impact™ (TUI™) ensures more soft tissue trauma and hydrostatic shock than you would think possible from a small projectile. Representing the pinnacle of ballistic effectiveness, this handgun ammunition proves that lethal force from a small caliber projectile is not only possible, but something you can count on.

Superior in Law Enforcement and Security

The pinpoint accuracy and terminal performance of 357SIG (TUI™) ammo makes it eminently suitable for law enforcement and security work, as well as for civilian home protection and self-defense. Each 95-grain round is constructed using only the best components, making this the match grade ammo to insist upon when consistent performance is essential. In situations where lives are on the line, you can draw your weapon with complete confidence, knowing your skills will not be compromised by your ammo.
