The Fort Scott Munitions (FSM™) 38 Special +P ammo is a match grade round that is excellent for conceal carry ammo. This round is designed to be shot out of conceal carry revolvers thru bolt action rifles, however, it is not recommended for tubular magazine usage. With its Tumble on Impact™ (TUI™) design, you get a devastating wound cavity without sacrificing accuracy and penetration.

### Outstanding Performance

This ammo has been tested in various applications and performed well in all of them. With a tight accuracy of .78" at 25 yards and velocity of 1362 FPS, this 81 grain projectile shows outstanding performance. From snub nose to bolt action rifles, the performance stays consistent. Fort Scott Munitions™ 38 Special +P is a reliable ammunition that will give you the confidence you need to defend yourself and others when you conceal carry.

### Conceal Carry

This round is used in small, easy to hide guns that are perfect for conceal carry. The 38 Special +P is easy to use and great for men and women. This round is great to use in double action concealed carry revolvers due to its light recoil and enables you to quickly get back on your target.

### Full-Force Home Security

Our 38 Special +P ammunition is a great choice when you are in need of a show stopping round. The Tumble on Impact™ (TUI™) design leaves a devastating wound cavity created from the high degree of energy transfer and soft tissue/organ trauma will debilitate an intruder. The consistency and reliability of the ammo is just what you need to protect your home and family.
