Fort Scott Munitions' (FSM®) 62 grain 5.56 SBS™ (TUI™) rifle ammo is a match grade, solid brass projectile that is specifically designed to Tumble Upon Impact™ (TUI™) to provide critical lethal effects in every situation. Our #1 priority is for the safety of our customers. Slam fire is a slim-chance but we have experienced this in our testing.

Accurate and Ethical

If you are a hunter, you already know how important it is to have ammo with great accuracy. While using the 62 gr 5.56 NATO SBS™ (TUI™) ammunition, you can rest assured that your ammo will not infringe upon your aim. The 62 grain 5.56 SBS™ (TUI™) rifle ammunition is made from high quality projectiles, casings, powder, and primers that will give you a dependable and consistent performance you can count on.

Designed to maximize soft tissue trauma and to quickly stop your prey, this round delivers an accurate shot. The Tumble Upon Impact™ (TUI™) action insures a fast, humane kill perfect for varmint control and hunting small to medium game. This uniquely designed, patented spitzer shape delivers excellent precision in each round.

Brass Ammo

You can easily target varmints and game ranging in size from wood chucks to coyotes and hogs with confidence that the strong terminal performance of the 5.56 SBS™ (TUI™) will get the job done. The ballistic advantage of this bullet ensures you get the most from every hunting trip. That makes this the perfect round for smaller hunters and shooters.

Ammo for Offense and Defense

Not only is the 5.56 SBS™ (TUI™) great for hunting, it is also a great self-defense round. If you own a rifle like an AR-15 for self-defense, this ammunition is an ideal choice. In a critical situation, you can't afford to have to think twice. These bullets neutralize and incapacitate an assailant with just one shot. The 5.56 SBS™ (TUI™) is even perfect for law enforcement to use in the force. It has a patented, Tumble Upon Impact™ (TUI™) design that ensures maximum tissue damage from a single shot.
