

LIGHT BY JUUL

AMBIENCE AND SLEEK DESIGN WITH THE LAMPS FROM LIGHT BY JUUL

ABOUT LIGHT BY JUUL Our story begins in a newly renovated house north of Copenhagen, on a spring morning back in 2017. After months of construction meetings and the seemingly endless noise stemming from said construction, the final details were in place. The whole building process was thought through, proper materials, perfect constructions and solutions. However, the owner of the estate, Peter Juul, was not satisfied; Something was missing.

The ambience and the essence of 'Hygge' was not achieved.

The driveway and the garden were pitch black. The only implemented light source was at the front of the house, which barely lit-up the front door. The house needed outdoor lighting – Problem was, outdoor lighting was proving particularly difficult to find.

This is the beginning of Light By Juul. A house-renovation project became an idea, the idea became a product, and the product became a patent.

The rest is history.

WHY CHOOSE LIGHT BY JUUL?

DESIGN

Our solutions are innovative, tailored and patented to fit your needs. We've created a wide array of innovative lighting products so unique we've had to get it patented. It's taken us years of hard work and we've put a ton of hours into developing our products. We're not just selling rocks with light sources, but a complete package. Where everything is custom made, down to our cables and converters.

POWER CONSUMPTION

Our LED-lights are very economy friendly. Our Cosmos lamp use 0,6W pr. Hour. This lamp can run for 1666 hours spending only 1 KW power. We're proud to say all our lights are LED-based, which maximizes power consumption. Our lighting solutions provide you with unique design and ambience, whilst simultaneously giving you an environmentally friendly approach to shine a light on your estate.

HANDCRAFTED IN DENMARK

Our spear lamps are more than just lighting. They're handcrafted in Denmark and created for design-oriented people who aren't willing to compromise with quality. We've already got multiple options for the exterior design of our lamps. We've got the elegant and refined look, or the raw and rusty look. The choice is yours! - Whatever you choose, our lights guarantee a unique ambience in your garden.

LIGHTS WITH A PASSION

Passion for lamps and lights is the heart of our operation. We never compromise and we strive for perfect outdoor lighting solutions. Every. Single. Time. Our level of dedication means our counselling is individual and changes from customer to customer. Our goal is, that you get the best possible lighting solution that showcases whichever area matters most to you.

A COMPLETE SOLUTION

Our lights aren't a result of coincidences. We're not just selling rocks with light sources, but a complete package. Where everything is custom made with waterproof screw joints, down to our cables and converters. It's our goal to deliver a complete solution that qualifies for the term 'plug-and-play'. Our solution can easily be installed without the assistance of electricians and other trained professionals.

LIGHT IN YOUR WOODEN TERRASSE

Don't miss out on the possibility of unique ambience on your terrasse. Let the light set the mood you refuse to settle on. An atmosphere that captures the moment and brings magic into your life.

SANDSTONE

Let Light By Juul convert your project to a magical wonderland. Witness how sandstone and the Cosmos-lamp melts together to create natural elegance. Only your imagination defines how far your project can go.

BRICKS

When Light By Juul gets implemented in your bricks you can almost hear a faint symphony playing in your garden. Instant harmony. We guarantee you will never want to go back. Let the magic shine a light from your bricks.

YOUR TILES

Why not pamper your existing tiles or bricks? Let's elevate your existing garden with a brand-new look from Light By Juul. You can create something extraordinary where the light transforms and spotlights your tiles.

LIGHT IN STONE AND PAVEMENT

When a single tile becomes an enchanting lamp. Let the beauty of nature connect with the light. Let the light create an oasis of light and aesthetics well above your expectations.

WOODEN TERRASSE

The Cosmos lamp is the obvious choice for wooden terrasses. It was a width of spread of 125 degrees and with a power consumption of only 0,6W, you're guaranteed the wood of your terrace will blend nicely with the subtle and soft light.

GARDEN

The primary choice for your garden is the Juulius lamp for trees and bushes where you want direct focus. Cosmos is used for the cozy feeling next to a pathway or in your flower bed.

STAIRS

You need a light to shine your path, so you don't trip and stumble in the dark. You can place the light from the side of the stairs, with this placement, the light will be mellow and soft as you walk down the stairs.
