TREKPAK™

The endlessly customisable and elegantly designed divider system

TrekPak allows you to make full use of the space available inside your case. The rigid divider pieces can be easily cut to size and then connected using the pins and ribbons. As your setup changes, your TrekPak can be reconfigured as required.

ELECTRONIC & SPECIAL CASE INSTALLATIONS

CUSTOMISATION SERVICES

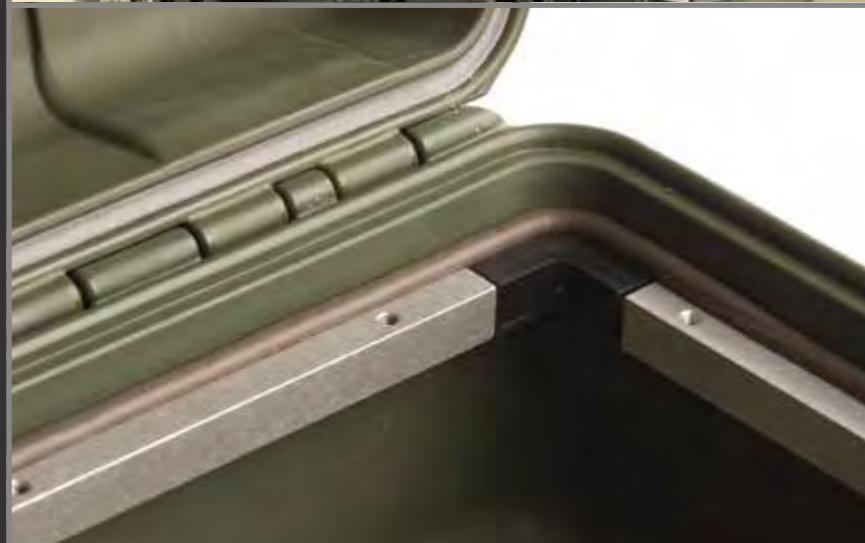

PANEL FRAMES

Panel frames are brackets that are secured to the inside of Protector cases to mount electronics or instrumentation panels. Panel frames come with an o-ring seal, ensuring the case remains watertight, even with an open lid.

BEZEL KITS

Bezel kits are the Storm case equivalent of a Panel Frame. They are made from aluminium and can be mounted in either the lid or the base of the case, depending on your requirements.

FOAM LASER ENGRAVING

We are able to engrave an intricate design into foam using a highly accurate laser to achieve a crisp finish, whether it's for your branding, logo, or even batch identification.

CUSTOM DECALS

Custom decals are a great way to add a professional touch to your case, while raising awareness of your business or brand, particularly for OEM customers and companies.

NAMEPLATES

Compatible with most Peli Protector cases, personalise your case with an engraved nameplate, to identify your company, brand, or equipment serial number.

SCREEN PRINTING

Make your brand or business stand out just that bit more by having your company logo screen-printed directly onto the exterior of your case.

PADDED DIVIDERS

The most shock absorbent and adaptable way to protect your gear.

The Peli™ Padded Divider range has been used by many industries since their introduction into the market over 20 years ago. They are comprised of impact cushioning foam, wrapped in looped nylon, bookended with velcro folds, designed to fit perfectly within your case and can be easily reconfigured as your contents changes.

RECONFIGURABLE

VELCRO ATTACHMENT

SHOCK ABSORBENT

PICK 'N' PLUCK™ FOAM

Three decades of absorbing impact and moulding to contents.

Pick 'N' Pluck has been a staple of the Peli range since the very beginning and continues to be the most popular way to protect case contents. The pre-scored cubes allow the foam to be easily shaped around your gear as needed, protecting against knocks and drops in transit.

IMPACT RESISTANT

PRE-SCORED CUBES

EASY SETUP

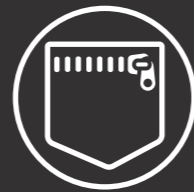

LID ORGANISERS

Transform the lid of your case into a user-friendly storage space.

Across the Peli range you'll find a multitude of lid organisers custom designed for over 20 cases. Using a combination of pockets, wallets, straps and zips, the Peli have created the largest range of lid organisers in our market.

SPACE EFFICIENT

ZIPPED POCKETS

EASY SETUP

MOLLE PANELS

A rigid, durable lid insert to effectively use and optimise the case's lid space.

The Molle panel enables the user to attach an unlimited combination of their own MOLLE pouches and Velcro™ straps to the inside of the case lid to organise gear to their own exact requirements. These panels use twist-cam locks to detach from the case for a swift changeout.
