# ACNE

"The treatment that finally cleared my acne."

# Acne

It is common to feel self-conscious about your skin's appearance when battling cystic or inflammatory acne. Treatment can help boost self-esteem and confidence,<sup>1</sup> so you can feel great about your skin again.

**Acne is the #1 skin condition in the United States, affecting up to 50 million people each year<sup>2</sup>**

## Clear acne at the source

Vbeam® Prima laser therapy targets inflammatory acne lesions, reducing both the bumps and associated redness.<sup>3,4</sup> Vbeam treats acne beneath the skin's surface by slowly heating the blood cells to help attack bacteria.<sup>3</sup>

In a clinical study, Vbeam laser therapy cleared more than 90% of inflammatory acne lesions in treated patients<sup>3</sup>

- ✓ Clinically proven to help clear inflammatory acne<sup>3</sup>
- ✓ May be used to complement oral or topical treatments
- ✓ Fast treatments, lasting results<sup>3</sup>

## What to expect

- Expect 3 to 6 monthly treatment sessions for inflammatory acne. Each treatment lasts approximately 20 to 30 minutes
- Number and duration of treatments will vary depending on the condition and your skin type
- Your healthcare provider will administer instant cooling to the skin before, during, and after treatment for added comfort
- In a clinical study, patients who underwent Vbeam laser therapy for inflammatory acne said their treatments were nearly pain free with few to no side effects<sup>3</sup>
