

4 FLOWERING HOUSEPLANTS

(THE ANTHOPHILE HASN'T EVEN HEARD OF)

ANTHOPHILE(N): AN ORGANISM THAT LIVES AMONG FLOWERS, LOVER OF FLOWERS.
EX: MY MOTHER, A FIRST-RATE ANTHOPHILE, JUST FINISHED SINGING HER PEACE LILY A LULLABY.

Let's welcome this baby from the deserts of Africa and the Middle East! Bonsai-like stems and loud hues make this a show stopper for your interior.

DESERT ROSE

TURN UP ... THIS GIRL LOVES THE HEAT!

I CAN'T GO OUT... I'M BUSY PETTING MY PLANT.

Remind you of a caterpillar? That's no accident! Named after the French word for just that, its furry flowers make it SO UNIQUE and fun to touch!

CHENILLE

Meet the "Eternal Flame"! It has everything you're looking for: Easy care, amazing color, and a touch of tropical!

CALATHEA CROCATATA

SUDDENLY I WANT A DRINK BY THE BEACH...

I'M NOT IRISH... SO SIGN ME UP!

FALSE SHAMROCK

When you go to sleep at night, you can bet this plant does too! It's photophilic, capturing the daylight in waking hours and shutting its leaves in the evening. Purple lovers should have this one on their radar!
