iH-B ABP Recorder is lightweight, convenient to use, and energy-efficient, making it ideal for everyday use, the recorder employs an advanced digital signal processor and a flash memory to be able to record up to 500 BP measurements.

# iH-B Ambulatory Blood Pressure Recorder

# iH-B

## Ambulatory Blood Pressure Recorder

### Features (Recorder):

- Check BP result on the LCD display;

- Pressure protection handled by double sensors to meet the requirement of IEC 60601-2-30;

- Storage medium: Flash memory;
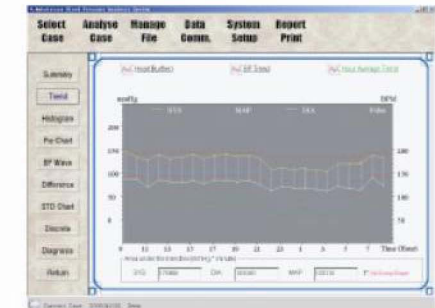

- Light weight, and energy-efficient.

Easy to use, reliable, fast and well-arranged – iH-B analysis software allows transfer BP measurement data from the Recorder to a Windows, PC-based computer program for the purpose of creating reports and printouts. Physicians can review artery pulsation waveform.
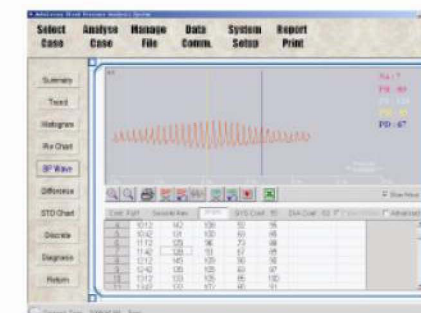

### Features(Software):

- Quick and accurate analyzing system;

- Reviewable analysis techniques to obtain BP measurement ;

- Highly intellectualized airflow control;

- introduction of advanced AGC (auto-gain-control) technology and components with a large

- dynamic range, which automatically adjusts to the variation of the patients' pulsation signal range.

Blood pressure histograms

Blood pressure & pulse rate trends

Reviewable artery pulsation waveform & tabulated numerical data results
