

## Washing Powder Recipe

### The Recipe

This all natural washing powder recipe has to be the cheapest and best value laundry detergent around.

The Washing Powder recipe was discovered on [cheapskates.com.au](http://cheapskates.com.au).

#### Ingredients

- 1 bar soap, grated
- 1 cup of Lectric Washing Soda
- ½ cup of borax

#### Method

1. Mix together and store in a sealed container.
2. Use two level teaspoons for a front loader or small top loader washing machine and three level teaspoons for a large top loader.

#### Optional

Give the washing powder an extra boost if you wash really dirty or greasy clothes by adding one small box of bi-carb soda to the mix.

#### Tips

- This powder doesn't bubble, you won't have suds
- Any type of soap will work for this recipe. Use laundry soap (usually the cheapest option), bathroom soap for a nice scent or simply use up left over soap you collect from your bathroom
- They grey water from your wash can be safely used on lawns
- It is safe to use your kitchen grater or processor to grate the soap, after all you wash it with detergent which is soap
- Alternatively use Lectric Washing Soda as a detergent booster. Add 1/2 cup of Lectric Washing Soda to washing machines to boost the cleaning power of all brands of detergent. It is a cheap all natural way to make every wash more powerful. Your whites will be whiter and colours brighter.
