

**URSA TEMPERATURE CONTROLLED
TRAVEL MUG**

How to Use

To use the TemperCharge Travel Mug:

- 1.Plug in your base with the provided cord.
- 2.Pour coffee, tea, or another hot beverage of your choosing into the TemperCharge travel mug.
- 3.Turn your mug on by pressing the “+” and “-” buttons at the same time and hold for two seconds. This will display the current temperature of your beverage.
- 4.Tap “+” one time to increase the temperature or “-” to decrease the temperature. The default temperature setting is 130° F, with a temperature range of 95 – 150° F.
- 5.Place mug on the base and adjust your temperature to your optimal enjoyment.

To use the wireless charging base:

- 1.Connect the included USB-C cable to the port on the bottom of the charging base.
- 2.Connect the USB-C cord to power and place the mug on the charging base.
- 3.Once placed on the base, four LED lights will appear on the mug. These lights will blink as the mug is being charged and stay lit when the mug is fully charged.
